UNIVERSITY of MOBILE

SCHOOL OF NURSING

GRADUATE STUDENT HANDBOOK

MASTER OF SCIENCE PROGRAM

2017-2018
PREFACE

The graduate program in nursing at the University of Mobile is a school under the College of Health Professions as well as the Graduate Studies at the university. The handbook was developed for graduate students and faculty to define the philosophy and mission of the graduate program and to provide a comprehensive document about the Master of Science programs in nursing. Information on requirements and coursework; advising, financial aid, professional organizations, and policies and procedures are included. It is essential that students understand the information presented in this handbook to facilitate their progression through the School of Nursing. All students in the University of Mobile School of Nursing are responsible for the information contained in this handbook which details practices, procedures, and provisions of the school pertaining to academic progress, professional expectations, and related matters.

The School of Nursing Graduate Student Handbook is reviewed annually and as needed. The graduate faculty in the School of Nursing reserve the right to revise the requirements and policies, as deemed necessary at any time, to prepare students for new and emerging roles in nursing. Dissemination of revisions will be made via class and online announcements, and/or notices or posted on the designated School of Nursing website. An electronic copy is available to all students via the School of Nursing website. In addition, the School of Nursing Graduate Student Handbook will be incorporated into the University of Mobile’s Online Undergraduate and Graduate Catalog and Student Handbook. Students will be notified of any changes made to the School of Nursing Graduate Student Handbook.

The Nursing Graduate Student Handbook is not all-inclusive; rather it includes basic information regarding the mission, goals, and expected outcomes of the School of Nursing, as well as the school policies and procedures that reflect national standards and guidelines for the education of graduate students in the nursing profession.

Each student must sign a Graduate Student Handbook Acknowledge Form (See Appendix A) indicating the student has read and are responsible for the information contained in the UM School of Nursing Graduate Student Handbook.

The University of Mobile endorses the intent of all federal and state laws created to prohibit discrimination. The University of Mobile does not discriminate on the basis of race, color, national origin, gender, sexual orientation, religion, age, veteran status in admissions or the provision of services.

Students are held accountable for information and policies published in official University of Mobile documents, including UM’s Online Undergraduate and Graduate Catalog and Student Handbook.
Welcome from the Interim Dean, University of Mobile School of Nursing

Dear MSN Students:

Thank you for choosing the Master of Science in Nursing in the School of Nursing at University of Mobile. On behalf of the faculty and staff we are excited that God has led you to become a student in the MSN Program and we are grateful for the opportunity to partner with you in fulfilling this God-ordained professional calling.

Opportunities for advanced practice nurses in health care are changing faster now than ever before and we are committed to preparing our students to embrace a myriad of opportunities as the nursing profession continues to evolve. We believe that you will leave enriched and well prepared to address the challenges facing health care as we endeavor to meet the health needs of individuals, families, and communities.

The graduate Student Handbook provides information on important policies, procedure and guideline pertinent to graduate nursing education at the University of Mobile. Our expectation is that you will use this handbook as your first point of reference when you have questions concerning your program of study or academic policies within the School of Nursing. We hope that you will find the Graduate Student Handbook a valuable resource in addressing your questions as a University of Mobile graduate student.

Congratulations once again on reaching this milestone in your professional career and we look forward to partnering with you in this educational endeavor.

Blessings,

Kathy Sheppard, PhD, MA, MSN, RN
Interim Dean School of Nursing
University of Mobile
Faculty and Staff Directory

The following resource persons are available to assist you in understanding the curriculum, policies and procedures, etc. in completing the Master’s in Administration/Education degree or the Master’s degree in Family Nurse Practitioner degree.

SECTION I: INTRODUCTION

History of the University of Mobile

The University is a church-related institution of liberal arts and sciences chartered in 1961 as Mobile College and affiliated with the Alabama Baptist State convention. The University is the creation a people with a Christian Vision. It's students are encouraged to become confident Christian men and women who have mastered the body of knowledge required by the degree they hold; who know how to think; who know what they believe and why they believe it; who posses the courage to live and work according to those beliefs; and who possess the willingness and skill to use their influence in appropriate and effective ways to change the world. The intent of the University is reflected in the preamble statement, “changing lives to change the world.” As stated in the mission statement, the University strives to establish and maintain a tradition of excellence in graduate programs.

History of the School of Nursing

The School of Nursing at the University of Mobile has a rich, 50-year history of preparing the finest professional nurses for our community and beyond. The Baccalaureate of Science degree in Nursing at the University of Mobile has its roots in the relationship between the University and Mobile Infirmary School of Nursing, which began in 1967. Students enrolled in the diploma program at the Mobile Infirmary School of Nursing were taking science courses at the University of Mobile. In 1973, Mobile Infirmary phased out the diploma program and supported the development of an Associate Degree Program at the Mobile College (Mobile College underwent a name change in 1993 and became the University of Mobile). In 1978, Mobile College established a Baccalaureate nursing program while continuing to operate the Associate Degree Program. The School of Nursing celebrates thirty-four years of preparing nurses, supporting the preamble statement, “changing lives to change the world.”

In 1987, the School of Nursing began a Master’s in Nursing Program (MSN) offering tracks in Adult Health Nursing and Nursing Administration. The University of Mobile School of Nursing has offered a Master of Science in Nursing Degree since 1987. The School of Nursing established a Family Nurse Practitioner Degree from 1995 until it was voluntarily suspended in 2008 due to decreasing interest and declining job prospects for the graduates. Since that time, the healthcare environment has changed dramatically and the need for additional advanced practice nurses has soared, again spiking interest in the community as well as nationwide. The Family Nurse Practitioner Program will be reopened in August 2017 pending SACS-COC approval.
Administrative Structure of the College of Health Professions

The College of Health Professions is currently composed of three schools incorporating the School of Nursing, the School of Health and Sports Science, and the School of Allied Health.

In the School of Nursing, there are five nursing programs, three resulting in an undergraduate degree Traditional Bachelor of Science in Nursing (TBSN); RN to Bachelor of Science in Nursing (RN-BSN); and Accelerated Bachelor of Science in Nursing (ABSN) and two resulting in a graduate degree (Master of Science in Education/Administration (BSN-MSN Track) and Master of Science in Family Nurse Practitioner (BSN-MSN Track).

The School of Nursing has a Department Chair for both the undergraduate and graduate programs who report directly to the Dean. The Graduate Department Chair directs both the Master of Science in Nursing Education/Administration Program and the Master of Science in Nursing Family Nurse Practitioner Program. The Graduate Program Chair, the Graduate Faculty Committee, and the Dean participate in the decisions regarding the governance of the MSN programs, ensuring that relevant professional standards and guidelines are incorporated.

School of Nursing Mission Statement

The mission of the University of Mobile School of Nursing is to provide quality education in a Christian environment in order to prepare competent, caring practitioners in nursing. The school aspires to the highest standards of educational excellence, blending a professional perspective with a liberal arts and science foundation. The school is committed to the development of its students into knowledgeable, caring, responsible and self-directed individuals able to meet the health care needs of a diverse and complex society. The University of Mobile School of Nursing emphasizes quality teaching while encouraging and valuing scholarly activity and research to support that teaching.

School of Nursing Philosophy

The School of Nursing, an integral part of the University of Mobile, is dedicated to the advancement of higher education based upon Christian values. The nursing programs of the University of Mobile seek to prepare nurses with Christian ideals to meet the nursing needs of humanity.

The human is perceived as a holistic being; a psychosocial, spiritual, cultural, ethnic, and racial being capable of feelings, emotions, thoughts, and actions. The human is capable of higher levels of functioning in the cognitive, affective and psychomotor domains. The human is in a dynamic interaction with the environment, which results in change in individual social systems and in health care needs. To serve
humanity, one must attempt to meet needs in totality since the human being is perceived as a unit and not a summation of parts.

Today’s society is complex and dynamic. It incorporates social controls to preserve its identity, to enable it to function systematically, and to be relatively enduring. Individuals assume roles within society, which are stipulated by the interaction between individuals and society.

Health is the physiological, psychological, and spiritual well-being of an individual, family, or group which allows or enables the individual, family, or group to function consistently at maximum potential. Health is an ever-changing state on a continuum from peak wellness to extreme states of ill health dependent upon individual or group adaptation to stressors. Rapid changes in science, technology, knowledge, and health problems, along with striking differences in family structures, emphasis on the legal rights of the individual, and cultural and environmental factors influence health needs.

Nursing is a collaborative process in which nurses assist the client and the client’s significant others in performing those activities which contribute to the achievement of maximum health potential through a holistic care approach. Nursing seeks to influence man’s balance on the wellness-illness continuum in a positive manner. A perception of, and concern for the needs of individuals, families, and groups are essential to nursing, as well as effective communication with individuals and the entire health care team.

The nursing process is a systematic problem-solving approach utilizing critical thinking for validating the perceived needs and problems of clients. This problem-solving process applied to nursing practice involves assessing, analyzing, planning, implementing, and evaluating. After identifying the needs and problems of individuals, families, and groups, the nurse formulates a nursing diagnosis. In collaboration with other health team members, the nurse plans, implements, and evaluates nursing care. Use of the nursing process promotes responsibility for nursing actions.

Education is the process involving teaching and learning by which one acquires knowledge, skills, values, attitudes, and the ability to think critically. Learning is viewed as a change in behavior based on the learner’s perception of that which is to be learned. Each learner and teacher is an individual with a unique background of experiences. The student analyzes, synthesizes, and integrates relationships among new and previous learning’s. In the teaching/learning process, a teacher facilitates the student’s learning. Relevance in learning depends upon how closely the student individually perceives the learning experience.

Nursing education assists the student to acquire the knowledge, which is essential to the profession. This includes, but is not limited to, developing a knowledge base for nursing, developing proficiency in selected psychomotor skills, and a model for
nursing practice. Based upon this, qualified nursing faculty members recognize the uniqueness of the individual learner and seek to guide each student in learning experiences. Nursing education is more thorough and perception is broadened when students are assisted in maintaining high input into their own learning and are guided by measurable goals and objectives.

A professional nurse is accountable for nursing actions. The professional nurse possesses the ability to continue professional and personal growth by pursuing lifelong learning as evidenced by completion of educational courses and/or graduate study, active participation in professional and related organizations, and being a contributing member of society.

Nursing education at the master's level prepares a specialist who can function in a variety of advanced roles. Education at the master's level in nursing involves expanding previous knowledge and skills and developing expertise in a specified area. Master's level nursing education allows the student to become more involved in self-learning through critical inquiry, analysis, and research.

**School of Nursing Goals**

The goals of the University of Mobile School of Nursing reflect the overall mission of the university to enhance the health and quality of life for all. The School of Nursing strives to:

1. Develop academic programs that meet the needs of society and incorporate best practices in nursing education.
2. Provide a supportive, collegial environment that encourages excellence in teaching-learning, professional development, and faculty/student scholarship.
3. Develop leaders capable of improving clinical practice outcomes, health policy, and care delivery methods.
4. Prepare graduates able to provide safe, evidence-based, culturally competent, patient-centered care that reflects ethical clinical judgment and interprofessional collaboration.
5. Cultivate in students an intellectual desire for advanced study and inquiry.

**University Core Values**

The University of Mobile is a Christ-centered academic community providing professional programs to renew minds through intellectual and spiritual development for the fulfilling of one's professional calling. The core values of the University are supported by the nursing faculty and reflected in how we work and interact with others. The core values:

- Christ-centered
- Academically-focused
- Student-devoted
• Distinctively-driven

**University Biblical Worldview**

The faculty in the School of Nursing embrace the concept of teaching a biblical worldview to our students. The biblical worldview serves as a pathway by which students are prepared to fulfill the Great Commission as noted in God’s Word through:

“The fear of the Lord is the beginning of wisdom...” | Describes our calling to Him. (Proverbs 9:10)

“Then God said, Let Us make man in Our image, according to Our likeness;...” | Describes who we are in Him. (Genesis 1:26)

“And do not be conformed to this world, but be transformed by the renewing of your mind, that you may provide what is that good and acceptable and perfect” | Describes our transformation in Him. (Romans 12:2)
SECTION II: PROGRAM DESCRIPTIONS

Accreditations and Approvals

The University of Mobile Master of Science Program’s are accredited through the Commission on Collegiate Nursing Education, One Dupont Circle NW Suite 530, Washington, DC 20036.

The Master of Science in Nursing Family Nurse Practitioner Program received approval by the Southern Association of Colleges and Schools Commission on Colleges (SACS-COC) and will begin in August 2017. The address for SACS-COC is 1866 Southern Lane, Decatur, GA 30033.

The University of Mobile MSN Graduate Degree Programs is approved by the Alabama Board of Nursing, RSA Plaza, Suite 250, 770 Washington Avenue, Montgomery, AL 36104.

Graduate Program Options

- MSN Education/Administration Program
  - BSN-MSN Track
- MSN Family Nurse Practitioner Program
  - BSN-MSN Track

Graduate Program Descriptions

The Master of Science in Nursing program builds on the knowledge and competencies of baccalaureate nursing education. The structure and process of the master's program provides for the attainment of advanced knowledge and the skill in the practice of nursing.

The Master of Science in Nursing program at the University of Mobile School of Nursing has two program options:
1. Nursing Education/Administration Program (BSN-MSN Track)
2. Family Nurse Practitioner Program (BSN-MSN Track).

Master of Science in Nursing Degree in Nursing Education/Administration

Graduates of the Master of Science in Nursing degree in Nursing Education/Administration are equipped to teach in academic settings, acute care health facilities, and community health agencies. The MSN in Education/Administration Program is structured around the major components of theory, research, and practice. The concepts of leadership, critical thinking, decision-making, and planned change are integrated throughout the curriculum. The graduate nursing student at the University of Mobile will develop specific roles through refinement of existing professional skills,
expansion of the knowledge base for practice, and development of advanced competencies in a specified area of practice.

The courses in the MSN Nursing Education/Administration Program are taught in a blended format. Students have opportunities to attend classes on campus as well as to complete course work in an online arrangement. Courses are completed in a sixteen (16) week trimester schedule and a twelve (12) week summer schedule. Both part-time and full-time formats are available for students in this course of study.

Master of Science Nursing Degree in Family Nurse Practitioner (FNP)

The MSN-FNP Program is designed to prepare the student for a career in advance practice nursing roles in primary care settings, providing care across the lifespan to children, adolescents, child-bearing women, and adults. The focus of the FNP is the management of common acute and chronic health care problems in diverse settings. Population health and epidemiology, management of information systems, and inter-professional collaboration are all emphasized. Pharmacology and pathophysiology prepare students for diagnosis and prescriptive authority.

All courses in the MSN Family Nurse Practitioner Program are offered online via the internet using a learning management system that includes a variety of technologies for interaction among students and faculty. Courses are completed with three sixteen (16) week trimesters and one twelve (12) week summer schedule. There is a 1-2 week break between each academic term. Upon acceptance, all students are admitted to the full-time completion plan.

**Graduate Program Expected Outcomes**

Graduate study at the master’s level builds on baccalaureate education and is designed to prepare scholarly, specialized nurses capable of assuming leadership responsibilities in current and emerging health care systems. The Master’s Degree programs in nursing provide students with diverse theoretical, clinical, and managerial learning experiences, which allow them to function in a broad variety of roles in advanced nursing practice. At the graduate level, students develop specialized competencies and greater capability to function in changing, complex health care delivery systems.

The curriculum guiding the University of Mobile Master of Science degree adheres to the Essentials of Master’s Education for Advanced Practice Nursing as articulated by the American Association of Colleges in Nursing (http://www.aacn.nche.edu). The guidelines of the AACN serve as a framework for the graduate nursing program. Upon completion of the graduate nursing program, the graduate will be able to
demonstrate the knowledge, clinical skills, and professional attitude expected of the Master’s prepared nurse.

**Master of Science in Nursing Education/Administration Program Outcomes**

Upon completion of the master’s program in Administration/Education, the learner will:

1. Utilize theories from nursing and other disciplines to improve health care and nursing education outcomes.
2. Develop organizing frameworks for the delivery of health care for teaching nursing.
3. Contribute to the development of the scientific knowledge base in nursing by recognizing researchable problems, and participating in research to advance the practice of nursing and improve nursing education.
4. Incorporate leadership strategies and local, state, and national health care policies into plans to effect improvement in nursing education and the health care system.
5. Apply principles of economics and budgeting into fiscal plans for administering health care or nursing education programs.
6. Utilize an identified process for guidance in making ethical decisions.
7. Consider human diversity when planning and implementing health care and teaching activities.
8. Contribute as a leader to the restructuring of professional nursing roles as health care and nursing education needs emerge in society.

**Master of Science in Nursing Family Nurse Practitioner Program Outcomes**

Upon completion of the master’s program in Family Nurse Practice, the learner will:

1. Implement the selected advanced nurse role as a practitioner within health care.
2. Develop and nurture inter-professional collaborations by communicating and consulting with other health care professionals, including physicians, administrators, community leaders, regulators, and other health care providers.
3. Evaluate the influence of ethical principles on personal and organization decision-making.
4. Utilize nursing research for the promotion of quality nursing education, safe client-center health care, and evidence-based practice.
5. Apply principles of economics and budgeting into fiscal plans for administering health care.
6. Employ critical thinking in the application of nursing and multidisciplinary theoretical frameworks to foster optimal client health outcomes.
7. Consider human diversity when planning and implementing health care and teaching activities.
8. Demonstrate competence in leadership roles and a commitment to ongoing professional development for the provision of quality, cost-effective, client-centered health care and the advancement of nursing practice.
School of Nursing Expected Outcomes

1. To prepare graduates with an adequate background to assure the achievement of appropriate credentials.
2. To prepare graduates who will practice the profession in a competent, caring manner, utilizing ideals and standards consistent with the Christian faith.
3. To provide students with an education broad enough to assure a career in nursing, based not only upon nursing knowledge, but also upon a background of liberal arts and sciences.
4. To prepare graduates who are able to think critically, and to express themselves clearly, correctly, and succinctly both orally and in writing.
5. To provide opportunities for students to develop fully in a variety of areas including physical, social, spiritual, and professional, as both a leader and a follower.
6. To provide opportunities for students to develop nursing skills in a variety of backgrounds within the practice setting.
7. To provide an environment in which the student recognizes the importance of community service as a part of the professional and Christian commitment.
8. To provide a background for continuing learning for the graduate in both the formal and continuing education arenas.

Standards and Documents Relevant to the Master of Science Programs

Curricula for the graduate programs use the following standards of education and practice: The American Nurses’ Association Code of Ethics for Nurses with Interpretive Statements (ANA, 2016) and the Nursing: Scope and Standards of Practice, (ANA, 2015) as well as the Alabama Board of Nursing Practice Act and Administrative Code (2016). Specific standards of practice for each program include: The Essentials of Master’s Education in Nursing (AACN, 2011) and Criteria for Evaluation of Nurse Practitioner Programs (National Task Force on Quality Nurse Practitioner Education [NTF], 2016). Standards of practice for clinical specialty areas are also incorporated, including core competencies put forth by organizations such as the National Organization of Nurse Practitioner Faculties (NONPF, 2016) that are integrated as appropriate.

The Master of Science degree program is guided by the following standards and documents, which are available online.

American Association of Colleges in Nursing (AACN; 2016) Adult Gerontology Acute Care and Primary Care Nurse Practitioner Competencies.

American Association of Colleges in Nursing (AACN; 2011). The Essentials of Master’s Education in Nursing.

Commission on Collegiate Nursing Education (CCNE; 2016 Revision). Standards of Baccalaureate and Graduate Nursing Programs.

Criteria for Evaluation of Nurse Practitioner Programs (National Task Force on Quality Nurse Practitioner Education, 2016); NTF Criteria.

National League for Nursing (NLN; 2013 Revision). Scope of Practice for Academic Educators.

SECTION III: ADMINISTRATIVE POLICIES AND PROCEDURES

Address/Name Changes

It is important for University officials to be able to locate and to send official correspondence to students. Students are required to notify the School of Nursing for address and name changes through the School of Nursing Administrative Assistant. It is the student's responsibility to keep address and other directory information current. Enrolled students may report address and name changes and emergency contact information to the School of Nursing Administrative Assistant.

Americans with Disabilities Act/Student Disability Services

The University of Mobile provides accommodations to enable students with disabilities to access the University community, in compliance with Section 504 of the Rehabilitation Act of 1973 [29 U.S.C. 794(a)] and the Americans with Disabilities Act of 1990 (ADA) [42 U.S.C. 12101, et seq.]. Reasonable accommodations are determined based on current documentation and are made on a case-by-case basis. Adherence to academic standards that are essential to a course of study is generally considered non-discriminatory. Students with disabilities are required to maintain the same level of responsibility for their education as other students attending the University of Mobile. These responsibilities including maintaining levels of academic performance expected of all students, meeting class requirements, maintaining appropriate behavior, and following the University's policies and procedures.

Students requesting accommodations from the University of Mobile must self-identify by contacting the Center for Student Success. The university encourages students to request accommodations before the semester begins. If the students chooses to delay providing documentation and/or making a request for accommodations, the University of Mobile will not provide accommodations in a retroactive manner, but will upon the student’s request begin the procedure for approving and implementing future accommodations. A reasonable amount of time will be necessary and expected in order for the university to implement these accommodations. Submitting an application for accommodations does not ensure that the student qualifies to receive accommodations.

The Center for Student Success determines the student's eligibility for accommodations and, for eligible students, determines appropriate accommodation. The University of Mobile will provide reasonable accommodation as long as it does not fundamentally alter the nature of the program. In the event that a student is unable to fulfill admission and progression standards, with or without reasonable accommodation, the student will not be admitted into, or be allowed to progress in the School of Nursing.
The nursing program at the University of Mobile is a rigorous mental and physical program and places specific requirements on the students enrolled in the program. All nursing students must be able to meet the Core Performance Standards (See Appendix B). In addition, students are expected to complete all the academic and clinical requirements of the graduate program in nursing before they are eligible to graduate and/or test with a national credentialing agency such as the American Academy of Nurse Practitioners (AANP) or the American Nurses Credentialing Center (ANCC).

The confidentiality of all documents will be maintained in accordance with the applicable law. Documentation may be shared with faculty or staff members on a need to know basis.

**CastleBranch**

The University of Mobile has contracted with CastleBranch to gather and maintain records and other required documentation for nursing students. All students must present documentation of all of School of Nursing requirements to CastleBranch, the designated non-affiliated vendor for the University of Mobile School of Nursing. Each student will be emailed a package code to allow for submission of documents (immunizations, health history, etc.) and compliance tracking.

Students will be provided an information sheet regarding how to log on and activate an account with CastleBranch. From within you CastleBranch account, you will be able to manage the requirements of the graduate program, complete tasks as directed to meet deadlines, upload and store important documents and records.

If students need assistance with their CastleBranch account, they should visit the CastleBranch Service Desk at 888.850.4314 or 888.723.4263, extension 7196.

**Commencement**

Degree-seeking graduate students are expected to complete all requirements for graduation in order to participate in commencement. Master of Science (MS) degrees are awarded to nursing students who have completed all required courses in their respective curricula and are students in good standing at the University.

Students must submit an application for graduation to the Registrar's Office during the semester before they intend to graduate. The deadline for this application is published each semester on the university website.
Confidentiality and HIPPA

The faculty and staff of the University of Mobile School of Nursing recognizes the importance of protecting the private and confidential information of patients/clients, their families, employees, staff and peers as well as the operation(s) of agencies within which the faculty and students practice.

It is the legal and ethical responsibility of every student to abide by the laws relative to privacy including the Health Insurance Portability and Accountability Act of 1996 (HIPPA) guidelines. HIPAA regulations require providers to protect patient confidentiality in all forms – oral, written, and electronic. All information pertaining to patients/clients is considered confidential. Students must agree to abide by the regulations promulgated by the American Recovery and Investment Act of 2009 (HITECH or Health Information Technology for Economic and Clinical Health Act) as applicable to each clinical agency used for clinical laboratory experience.

HIPPA regulations provide serious civil and criminal penalties for violation. Civil penalties can be as high as $25,000 per violation. Even unintentional disclosure can involve serious penalties.

All nursing faculty and nursing students agree to:
• Adhere to HIPAA and HITECH guidelines.
• Read, understand, and comply with confidentiality and privacy policies in each clinical experience.
• Access, use or share confidential information only as it is essential and allowed by law. All printouts, photocopies, written and electronic information produced for use during a clinical shift must be secured at all times and destroyed prior to the end of that clinical shift. Notes and work products, necessary for academic requirements, must have all identifiers removed.
• Never release protected health information to any unidentified source.
• Avoid discussion or disclosure of patient information outside of the academic setting. This includes, but is not limited to, areas of public and social gatherings, on-line social networking, social media, blogs, and any areas specified by the policy of the clinical setting. Students should never talk about patients/clients in public, avoiding conversations in elevators, dining facilities, and in situations where others may overhear.
• Avoid leaving patient/client records or information where unauthorized persons might see them. No part of the medical record, or duplication thereof, may be removed from the clinical setting. At all times, the medical record must be secured according to the clinical setting’s policy.
• Avoid the use of patient/clients names using initials only.
• Immediately report to the clinical and course faculty any incident or suspected incidents of unauthorized access and/or disclosure of protected health information.
Communicating with Faculty

Students are encouraged to stay connected to their faculty advisors and course faculty. Faculty members are available to provide assistance with concerns related to course content, examinations, and writing assignments.

A number of different sources are available for students to communicate with faculty. Most faculty and staff are on the University of Mobile Voice Mail System. If the individual you are attempting to contact does not answer the telephone, the voice mail system is activated and students may leave a succinct message regarding the purpose of your call. In addition, leave your full name, telephone number, and a time that may be convenient to return your call. It will be important that you speak slow and distinctly as you leave your information. A listing of these numbers is provided in the faculty directory on the School of Nursing website.

All faculty and staff maintain a University of Mobile email account. Students may email faculty and these addresses are published in the faculty directory on the School of Nursing website.

Core Performance Standards

A candidate for a nursing degree must possess abilities and skills, which include the Core Performance Standards (See Appendix B). The Core Performance Standards are the cognitive, psychomotor, and affective learning skills needed by the student to meet program objectives and requirements. The use of a trained intermediary is not acceptable in that a candidate's judgment must be mediated by someone else's power of observation, selection, and assessment.

CPR-AED/BLS Certification

Current infant, adult, and child CPR certification must be maintained during enrollment and submitted after each renewal process. The copy of the card must include the front and back, and the back must be signed. The course must be the American Heart Association Healthcare Provider. The proof of CPR certification must be uploaded to and approved by CastleBranch in order for the student to participate in graduate clinical learning experiences.

Criminal Background Check Policy and Procedure

The School of Nursing recognizes its role in maintaining a safe environment for students and patients/clients. Health care agencies require employees and students to meet local and state regulations. Therefore, a background check is required for all nursing students enrolled in the School of Nursing. Certain arrests or convictions, which could jeopardize the health and safety of patients, may render students ineligible for placement in a clinical agency. Ineligibility for placement in a clinical
agency to perform nursing care for completion of clinical objectives will result in course failure and dismissal from Graduate Nursing programs.

As a result of Joint Commission guidelines mandating criminal background checks on all employees, volunteers and students, healthcare agencies are requiring background checks and drug testing for nursing students working in clinical settings. Therefore, all graduate nursing students entering the UM School of Nursing will consent to and complete a Certified Criminal Background Check (See Appendix C). Failure to submit a Certified Criminal Background Check will suspend the matriculation process and/or enrollment in any graduate courses.

The Criminal Background Check will include a local and national review of relevant records including county of residence criminal records, residence history, Social Security alert, nationwide sexual offender registry, and nationwide healthcare fraud and abuse scan.

The School of Nursing recognizes its role in maintaining a safe environment for students and patients/clients. Health care agencies require employees and students to meet local and state regulations. Therefore, a background check is required for all nursing students. Certain arrests or convictions, which could jeopardize the health and safety of patients, may render students ineligible for placement in a clinical agency. Ineligibility for placement in a clinical agency to perform nursing care for completion of clinical objectives will result in course failure and dismissal from Graduate Nursing programs.

- New students: Matriculation will be conditional on completion of a criminal background check. Students may also be required to have additional checks once enrolled in the program. The School of Nursing must certify to clinical agencies, where students participate in clinical activities, that each student has had a negative background check with no adverse finding.
- Matriculated students: Supplemental or additional background checks may be required to meet the requirements of a clinical agency. Once enrolled in the Graduate Program, students are compelled to disclosure any legal or criminal convictions or arrests within a three (3) day time period.

Consequences for a Criminal History
- If a criminal background report indicates any positive criminal history, the Graduate Program Chair and the Dean for the School of Nursing will send a letter to the student requesting a written explanation of the indicated incident(s).
- If the student challenges the information in the report as erroneous, the Dean for the School of Nursing will ask CastleBranch to investigate further to determine whether the information is accurate.
- If the student responds that the positive criminal history report is accurate, the Graduate Program Chair and the School of Nursing Dean will notify the
A student in writing that they will be unable to attend the UM School of Nursing and withdrawal from the graduate nursing program is mandated.

- Students, who have been convicted of a felony or have pled nolo contendere to a felony or a crime involving moral turpitude, are ineligible for clinical placement and are deemed unable to complete program requirements.

A student who engages in illegal and/or immoral activities and/or who exhibits unprofessional conduct which directly or indirectly endangers the health or well being of another will be subject to dismissal from the program.

The criminal background report will be held in the strictest confidence; only those individuals who have a need to know related to the student’s enrollment and academic progress (e.g. clinical agency placement) will have access to this information.

**Disclosure of Legal/Criminal Convictions and Arrests**

Students enrolled in the Graduate Nursing Program must report any arrests or legal/criminal convictions including, but not limited to, misdemeanors, felonies, sexual offender convictions or government sanctions. If a student is convicted of any criminal offense(s) other than minor traffic violations subsequent to the criminal background check(s) obtained under this policy, the student is required within three (3) days after such conviction to report to the Dean of the School of Nursing the date and nature of the conviction and the court location. Failure to report arrests or legal convictions will result in automatic and immediate dismissal from the School of Nursing. The student will be ineligible to be re-admitted to the Graduate Nursing Program.

**Drug Screen Policy and Procedure**

The School of Nursing recognizes that alcohol abuse and drug use are societal problems that can affect nursing students. These problems can adversely influence the learning environment, and individuals with impaired judgment and decision-making capabilities are not safe in providing care in any health care setting. The School of Nursing has a vital interest in maintaining a safe and healthy environment for its students as well as the patient’s/client’s it serves. Any student under the influence of a drug or alcohol during clinical may pose serious safety and health risks, not only to themselves, but to the patients/clients they are providing care to.

As a result of Joint Commission guidelines, healthcare agencies are requiring drug testing for nursing students working in clinical settings. Therefore, all graduate nursing students entering the UM School of Nursing will consent to and complete a random drug testing (See Appendix D). Failure to submit a drug screening check will suspend the matriculation process and/or enrollment in any graduate courses.
Admitted students will not be allowed to progress in coursework without completion of a negative drug screen. A negative drug screen is defined as absence of any of cannabinoids, cocaine, opiates, phencyclidine, or amphetamines in the student's urine.

- New students: Matriculation will be conditional on completion of a urine drug screen. Students may also be required to have additional checks once enrolled in the program. The School of Nursing must certify to clinical agencies, where students participate in clinical activities, that each student has had a negative drug screen.
- Matriculated students: Supplemental or additional urine drug screens may be required to meet the requirements of a clinical agency.

Consequences for Positive Drug Test
- If the student’s drug screen is positive, the Medical Director of the Laboratory will contact the student requesting written proof of a prescription for the appropriate medication. Students who are unable to produce a prescription to substantiate legal usage of the medication will be dismissed from the School of Nursing.

Students Found to be Under the Influence of Illicit Drugs and/or Alcohol
Each student is expected to uphold and demonstrate professional and personal moral standards. The faculty subscribes to the intent of the university policy prohibiting the illegal possession, use or distribution of drugs and/or alcohol by students on university property or as a part of any university activity (on or off campus). Underage drinking is illegal.

Students manifesting behaviors in clinical settings including but not limited to, alcohol on breath, pupillary changes, slurred speech, motor incapacities, or other signs and/or physical symptoms suggesting impairment, will be questioned by nursing faculty or preceptor. If, in the faculty member’s or preceptor’s judgment, it is reasonable to believe that an impairment exists, then the student will be asked to leave the clinical setting immediately. A family member or friend will be contacted to provide safe transportation for the student away from the clinical site.

Students in the School of Nursing must comply with the legal, moral and legislative standards in accordance with the Alabama Board of Nursing Administrative Code. A student who engages in illegal and/or immoral activities and/or who exhibits unprofessional conduct which directly or indirectly endangers the health or well being of another will be subject to dismissal from the program.

Reasonable Suspension of Drug/Alcohol Use
In addition to the pre-clinical screening process for substance abuse, for the protection of patients, faculty, staff, and students, the School of Nursing has the right to require a student to submit to testing for substance abuse at the student’s
expense when a faculty member or preceptor has reasonable cause to believe the student is under the influence of alcohol or other drugs including:

1. Abnormal conduct or erratic behavior, absenteeism, tardiness or deterioration in performance.
2. Evidence of tampering with a drug test.
3. Information that the student has caused or contributed to harm of self, visitors, staff, or a patient/client while under the influence of drugs.
4. Evidence of involvement in the use, possession, sale, or solicitation of drugs.

Confidentiality

The criminal background report and/or status of the drug screen will be held in the strictest confidence; only those individuals who have a need to know related to the student’s enrollment and academic progress (e.g. clinical agency placement) will have access to this information.

E-Mail Policy

All University of Mobile official communications with the student will be provided through the UM E-Mail address that is assigned to the student upon official admission and enrollment. All official information including but not limited to, student billing, faculty-student communications, course registration, financial aid information, student handbook changes, etc.) will be sent to the student's email address representing official notification. The University accepts no responsibility, for any forwarding of email that the student may choose from their official UM email account. The University is only responsible for ensuring that email gets to the student’s email account that is maintained by the University. All students are responsible for monitoring their UM email account frequently (at least twice daily).

Only official University of Mobile email addresses will be used for communication from the School of Nursing.

Graduation Application and Requirements

Degrees of Master of Science (MS) are awarded to nursing students who have completed all required courses in their respective curricula and are students in good standing at the University.

Students must submit a form delineating intent to graduate form to the Registrar’s Office during the semester before they graduate. The deadline for this application is published each semester on the university website and/or is available in the Registrar’s Office.
Health History

Each student must complete a Health History form and upload it to CastleBranch annually. Students without a complete Health History form will not be permitted to begin their clinical rotations, resulting in immediate course withdrawal.

Immunizations

Health care workers, including students participating in clinical experiences, are at risk for contracting a variety of communicable diseases. The Center for Disease Control (CDC) has specific recommendations for health care workers, in addition to the usual adult immunization requirements, to better protect health care workers and the populations they serve.

The University of Mobile School of Nursing requires its students to provide validation of certain immunizations and/or immunities prior to the start of the clinical component and prior to clinical placements. All clinical sites require proof of immunizations and/or immunities required by the program prior to clinical placement.

Students who fail to provide proof of immunizations and/or proof of immunity required by clinical sites will not be permitted to participate in clinical experiences that are necessary for program completion. It is also possible that some clinical agencies may require immunizations in addition to those required by the UM School of Nursing.

**REQUIRED IMMUNIZATIONS**

<table>
<thead>
<tr>
<th>Vaccination</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Measles, Mumps, &amp; Rubella (MMR)</td>
<td>One of the following is required: two (2) vaccinations or positive antibody titer for all 3 components or documentation by a medical provider of an allergic reaction. If the titer is negative or equivocal, vaccinations are required.</td>
</tr>
<tr>
<td>Tetanus, Diphtheria, and Pertussis (Tdap)</td>
<td>Documentation of Tdap within the last ten (10) years or documentation by a medical provider of an allergic reaction. The next action date will be set for ten (10) years from the administered date of the vaccine.</td>
</tr>
<tr>
<td>Hepatitis B series</td>
<td>One of the following is required: three (3) vaccinations or positive antibody titer or documentation by a medical provider of an allergic reaction. If the series is in process, the next action date will be set accordingly. If the titer is negative or equivocal, additional vaccinations are required.</td>
</tr>
<tr>
<td>Varicella</td>
<td>One of the following is required: two (2) vaccinations or positive antibody titer or documentation by a medical provider of an allergic reaction. If the titer is negative or equivocal, additional vaccinations are required.</td>
</tr>
<tr>
<td>Tuberculosis</td>
<td>A PPD-Mantoux test (one step) is required annually. If PPD is positive, or student has previous history of a positive tuberculin skin test, a normal chest x-ray is required within 12 months, unless history of INH therapy is documented. Repeat chest x-rays are not needed unless student displays symptoms or</td>
</tr>
</tbody>
</table>
signs of TB or a health care practitioner recommends a repeat chest x-ray. The health care provider performing the annual physical should screen for signs and symptoms of TB.

A student may choose to do a blood test instead of a PPD. If the blood test is positive for TB, the student must provide written documentation from a health care provider defining treatment and release to work in a clinical setting.

This is an annual requirement for all student nurses.

### Annual influenza (Flu) vaccine

Submission of documentation of a flu shot administered for the current flu season or documentation by a medical provider of an allergic reaction. The next action date will be set for one (1) year.

---

**Waiver of Receipt of Required Immunizations**

If a student is unable to receive the required immunizations due to a medical contraindication, they must provide documentation by a licensed healthcare provider that they are unable to fulfill the requirement. Students may not provide waiver documentation from a family member or a close relative.

**Uploading Relevant Information to Tracker Service**

Students are supplied with detailed instructions on how to submit the completed documents to the online service known as CastleBranch where student information and health records are confidentially maintained. Submitted materials are reviewed to verify that the student is eligible for participation in the clinical courses. No student will be permitted in a clinical agency without submission of a waiver or completely fulfilling the immunization requirements.

---

**Lost and Found**

Any articles found in the nursing building should be given to the School of Nursing administrative assistant. If a student has lost any item, an inquiry should be made to Lynnelle Kahalley at 251.442.2253 or mailto:lkahalley@umobile.edu

---

**Net Etiquette**

Net Etiquette describes professional communication and behaviors for online communication and interaction (email, discussion board postings, chats, blogs, etc.) to ensure a forum for dynamic and engaged learning. The expectations for Net Etiquette are that all students are respectful and courteous in all communications. Teaching and learning processes work best with free and open exchange of ideas, yet in an electronic setting, without the benefit of facial expressions, body language or tonal cues, miscommunication and misunderstanding may occur. Students should demonstrate respect and courtesy by welcoming dissenting opinions, respecting personal privacy, and/or creating or maintaining a culture of civility.
Conduct in the online setting is as important as face-to-face interaction. Appropriate communication contributes to the perception of professionalism. Students should:

- Have honest and kind communication.
- Use clear, concise, and appropriate language.
- Use proper titles to address others (for example, Dr. Smith or Professor Jones).
- Be thoughtful, judicious, and professional about the use of emotions, sarcasm, jokes, or humor.
- Re-read, proof, and edit communications and discussion board postings before uploading and sending.
- Compose written communication, discussion board posts, or other online assignments offline before posting.

**ProctorFree**

Students enrolled in courses with examinations are required by the School of Nursing to take proctored exams online with a service called ProctorFree. The University of Mobile has selected this company for all on-line testing.

ProctorFree is an easy and effective way to maintain academic integrity in the classroom. The software provides a scalable, online, on-demand exam proctoring service that can be accessed by test takers at any time. ProctorFree authenticates the student using facial recognition and maintains continuous identify verification throughout the exam. Another feature is that the software monitors for a variety of events, behaviors, and patterns typically associated with cheating referred to as anomalies ([http://www.proctorfree.com](http://www.proctorfree.com)).

After students complete their examination, a detailed and optimized report of the proctor session is emailed to the faculty member or test administrator for review. Highlighted in the report are the minute and second where cheating-like behaviors occurred and allow the faculty member to determine if the student was involved in a cheating behavior ([http://www.proctorfree.com](http://www.proctorfree.com)).

For testing, students will need a computer with standard internet connection, a standard microphone, and a standard Webcam. Additional information regarding the process of using ProctorFree will be delineated in each course syllabi.

**Professional Conduct**

Nursing professionalism is comprised of behaviors, practices, and communication styles that demonstrate core values of nurses working to achieve optimal health outcomes in patients, families, and communities. This includes conduct that applies the principles of excellence, caring, ethics, respect, communication, and accountability. Students learn these principles through self-assessment, responsible learning, effective communication, and continuous professional engagement.
A student who engages in illegal and/or immoral activities and/or who exhibit unprofessional conduct which directly or indirectly endangers the health or well being of another will be subject to dismissal from the Graduate Nursing Program.

**Purpose of a Syllabus**

The course syllabus is designed by the instructor as a study guide and learning aid for the student. The syllabus is not intended to be construed as a contract, either expressed or implied. The instructor reserves the right to alter the syllabus as indicated. Students will be notified by email of any changes or modifications to the course calendar or course requirements as specified in the syllabus.

**School of Nursing Location and Hours of Operation**

The School of Nursing is located on the second floor (207 and 209 Office Suite) in the Weaver Building. The School of Nursing is open from 7:30 AM until 5:30 PM, Monday through Thursday.

**Social Media/Networking Policy**

The definition of “social media” is broad and constantly evolving. The term generally refers to Internet-based tools that allow individuals to communicate; to share information, ideas, personal messages, images, and other content, and in some cases, to collaborate with other users in real time. Social media is also referred to as social networking. Social media and networking includes but is not limited to:

- Blogs, and micro-blogs such as Twitter
- Social networks, such as Facebook
- Professional networks, such as Linkedin
- Video sharing, such as YouTube, Second Life, and vlogs (video logs)
- Audio sharing, such as podcasts
- Photo sharing, such as Flickr, Instagram, and Photobucket
- Social bookmarking, such as Digg and Redditt
- User created web pages such as Wikis and Wikipedia, and
- Any other internet-based Social Media/Social Networking application similar in purpose or function to those applications described above.

All University of Mobile School of Nursing students (clinical, didactic, research, teaching) must adhere to regulations provided by HIPPA, HITECH, ANA Code of Ethics, and assigned clinical agencies policies regarding any usage of electronic devices in or out of the clinical or classroom setting.

- Permission may be granted by nursing faculty or assigned preceptors to use electronic devices for enhancing learning in the classroom or patient care environment.

Some electronic communication, networking and/or postings are subject to public view; therefore, students are responsible for all content and are subject to
disciplinary action if they engage in misuse or abuse. Misuse of electronic devices includes but may not be all inclusive:

- Patient information
- Communication or postings of illegal, obscene, defamatory and/or slanderous statements
- Postings of obscene photos or videos
- Discrediting of any person(s) or group(s)

Students enrolled in the School of Nursing Graduate Program are expected to be compliant with the Social Media/Networking Policy. Appropriate and professional behaviors include:

- Maintain ethically prescribed professional boundaries surrounding the nurse-patient relationship in the online environment in addition to the classroom.
- Follow HIPAA guidelines at all times. Identifiable information concerning patients/clinical rotations must not be posted in any online forum or webpage.
- Report promptly any identified breach of confidentiality of privacy to faculty or other appropriate authority.
- Avoid transmitting or placing online individually identifiable patient information.
- Protect confidential, sensitive, and proprietary information. Do not post confidential or proprietary information about the university, staff, students, patients/clients, clinical facilities, or others with whom one has contact in the role of a University of Mobile nursing student.
- Practice restraint when disclosing personal information on social networking sites. Even seemingly innocuous pictures and comments can impact the respect and trust patients and others have for University of Mobile nursing students.
- When posting your point of view, neither claim nor imply that you are speaking on the University of Mobile’s behalf, unless you are authorized to do so in writing.
- Understand that patients/clients, colleagues, peers, institutions, and employers may view postings.

In accordance with the ANA Code of Ethics, it would be inappropriate and unprofessional for a graduate student to:

- Engage in communication with patients/clients and their family members on social networking sites.
- Post on behalf of the University of Mobile School of Nursing or as an official representative of the School of Nursing without written approval.
- Take any pictures in any clinical, laboratory, or practice site without written approval.
• Share, post, or transmit any personal information, health information, or images by way of electronic media. Sharing this information is a violation of patient's rights to confidentiality and privacy.

Considerations
• Students are legally liable for what is posted on their own site and on the sites of others. If in doubt, practice professional restraint and don't post.

Privacy does not exist in the world of Social Media/Social Networking. Consider the consequences if a post becomes widely known and how it may reflect on you personally as well as the University of Mobile and the School of Nursing.
• Consider the professional image you want to present and make sure that any content you post is consistent with your professional goals.

Social Media/Networking Policy Misuse Disciplinary Actions
Disciplinary actions will accrue throughout the students clinical, skills labs, classroom learning experiences, and online learning opportunities and may result in disciplinary action and/or immediate dismissal from the School of Nursing.

Students who share confidential information are at risk of disciplinary action including course failure and/or dismissal from the program. There may be legal ramifications for students who breach institutional confidentiality agreements.
1. First policy violation:
   • Notification of the incident to the Graduate Program Chair and the Dean.
   • One-on-one meeting with the course faculty.
   • Review of the UM School of Nursing Social Media/Networking Policy.
   • Actions may result in immediate dismissal from the School of Nursing.

2. Second policy violation:
   • One-on-one meeting with the Graduate Program Chair.
   • Review of said infraction and status in the School of Nursing.
   • Actions may result in immediate dismissal from the School of Nursing.

3. Third policy violation:
   • Immediate dismissal from the School of Nursing.

Standard Precautions

Due to the nature of the practice of nursing, students may come in contact with patients or specimens capable of causing disease. It is imperative that appropriate infection control techniques and precautions be followed. Appropriate standard precautions and needle and sharp precautions, as defined by the Centers for Disease Control are adhered to by the UM School of Nursing. In order to limit transmission of blood borne diseases, students are not permitted to perform invasive procedures on themselves or other students in the Nursing Skills Lab. Invasive procedures
include, but not limited to, any form of injection or venipuncture. Additionally, students may not practice invasive procedures on themselves, others students, faculty, or agency staff in the clinical setting. Students are permitted to perform invasive procedures in clinical care settings on patients with direct supervision of licensed personnel.

Despite careful and conscientious practice of standard precautions, it cannot be guaranteed that students will not be exposed to blood or body fluids.

All students should read and adhere to the Centers for Disease Control and Prevention (CDC) Basic Infection Prevention and Control and Worker Guidelines at www.cdc.gov/infectioncontrol/guidelines/index.html.

General Procedure Following Exposure, Illness, or Injury
If an exposure/illness/injury occurs during student experiences, the student is responsible for immediately reporting the incident to the clinical faculty and to the agency where the incident occurred. The initial care following any injury, illness, or exposure to blood or body fluid should be the same procedure used for employees of the agency. Regardless of the place for initial care (agency or private medical provider), the student or the student's insurance carrier will be responsible for any and all charges incurred. The post-exposure or follow-up care should be conducted by the student’s choice of private medical provider. All students are encouraged to maintain health insurance.

**Student ID Badges**

All students are required to have an official University of Mobile School of Nursing photo I.D. badge as a means of identification. The photo ID badge should be worn and be visible on the student’s lab coat at clinical sites.

**Student Leave of Absence**

The faculty recognizes the nature and the pace of the Master’s programs are rigorous and demanding. There may be times when the student’s personal, family, financial, medical, or work situation may require an interruption in the planned course of study. The student requesting a leave of absence must 1) submit a written request for a leave of absence, 2) confer with the course faculty and the Graduate Program Chair, and 3) follow readmission application policy for the MSN program.

**Technology and Computer Requirements**

The FNP program is a distance-mediated program offered online through a learning management system (LMS). As of August 2017, the University of Mobile is migrating from E-Learning to Instructure Canvas. It is possible that as this transition takes place, the student may take classes in both platforms.
The mechanism of delivery for the Graduate Family Nurse Practitioner Program will be as an asynchronous online/distance education program with mandatory on-campus Focus Sessions twice a calendar year (referred to as “Intensives”).

Participation in online courses requires the student to have access to a computer and being able to send and receive email. The University of Mobile provides an email account for every student. Your professor's must be able to correspond with you through email and may require you to communicate with your classmates through email. Course faculty and clinical preceptors will use your UM student email account for all email communication unless otherwise specified.

By enrolling in an online course, the student is granting the faculty permission to post their name and email address on the course website and otherwise distribute that information to other students in the class.

University of Mobile's network enables access to external facilities, systems, and other networks over which University of Mobile has no control, including capabilities, which are incidental to providing such access. Some of these resources may not support the University of Mobile’s goals and objectives. Although the University of Mobile does not exercise editorial or censorship control of such external resources, the University of Mobile expects that technology will not be used for purposes, which are immoral, illegal, or inconsistent with the mission. The University of Mobile Information Technology Department monitors faculty and student for Spam Email.

Inappropriate uses of technology include, but are not limited to those specifically prohibited by local, state, or federal law. Without limitation, examples of inappropriate uses of technology include:

• Sending of harassing, threatening, or obscene material to minors and/or non-consenting adults or any attempts to confuse or frustrate another user in achieving their objectives.
• Random or unauthorized bulk sending or mailing of messages.
• Inappropriate use of access.
• Unauthorized release of information and viewing of University of Mobile’s data outside of institutional objectives.
• Any disregard for the security mechanisms that are in place or other attempts to gain unauthorized access to technical resources. This includes possession of or attempts to acquire another user’s password or allowing others access to technology resources that are not allocated for their use;
• Malicious transmission of a computer virus.
Students are expected to:

- Utilize the UM email system as the primary means of communication for university issues between the student, faculty, and staff. To ensure a quality learning experience students are expected to check their email at least twice daily and respond to faculty with 48 hours of an initial email.
- Practice good Netiquette throughout each course by demonstrating respect.
- Assure that computer hardware and required software is installed.
- Assume a self-motivated, independent, and engaged learning role.
- Meet course deadlines.
- Maintain confidentiality regarding information communicated related to patients, employers, and other students.
- Obtain course work missed due to interruption in internet service or technology failure. Extension of assignment deadlines will be considered at the discretion of the faculty.

Given the nature of online learning, and in consideration of the software programs required for students in the graduate program, the following is a list of minimum computer specifications. Please ensure that your computer meets or exceeds these requirements, and that you have access to all required software and hardware components.

<table>
<thead>

</tbody>
</table>

The University of Mobile emphasizes the ability to utilize computer skills alone with various software packages in the educational setting. Computer skills needed to succeed in the nursing program include word processing along with the use of internet and email. Microsoft Word and Google Chrome are recommended.

**Tobacco Use and Smoking Policy**

The School of Nursing has a vital interest in maintaining a safe and healthy environment for its students as well as maintaining safe and healthful conditions for its patients/clients. Nursing students are not permitted to use tobacco products (including electronic cigarettes, as the vapors contain the toxin nicotine) when acting as a representative of the School of Nursing. This includes, but is not limited to, any clinical function, any time the student is in professional dress wearing their monogrammed lab jacket. Students are not permitted to smoke or use tobacco in
any format when attending a professional function required by the School of Nursing.

**Transportation Requirements**

Students are responsible for arranging their own transportation to all required on-campus visits (including Focus Sessions) and to all clinical practice sites and for releasing the University of Mobile and the School of Nursing and/or affiliated institutions from liability for any accidents in which they may be involved while traveling to and from these learning experiences.

Students also must release the University from liability for any accidents en-route between the University of Mobile and the School of Nursing and other institutions and localities to participate in learning experiences.

**Typhon Electronic Student Tracking System**

Students enrolled in the Family Nurse Practitioner Program are required to purchase and utilize the Typhon Nurse Practitioner Student Tracking System (NPST) software in all clinical courses as well as some didactic courses. Typhon NPST system is web-based, HIPAA compliant and allows students to quickly and easily document: 1) clinical time logs, 2) patient encounter information such as demographics, clinical information, diagnosis and procedure codes, medications, and brief clinical notes, and 3) achievement of program competencies ([https://www.typhongroup.net/np](https://www.typhongroup.net/np)).

The necessary clinical and patient information should be entered into the Typhon Log within three (3) days following each clinical day. Typhon is set to lock students out from entering any information after the three (3) day time period. Faculty will monitor the Typhon logs regularly to ensure that students are completing their clinical hours and have appropriate clinical experiences. Late entries will not be accepted ([https://www.typhongroup.net/np](https://www.typhongroup.net/np)).

At the end of each semester, students must provide a summary of their clinical time to the course faculty member.

**Unicheck Plagiarism Detection**

The University of Mobile’s School of Nursing highly values academic integrity and is committed to the fundamental value and obligation of preserving academic honesty among our students. The University of Mobile uses Unicheck software as a formative process to help students develop and improve scholarly writing skills, while promoting academic honesty. This product is used to identify plagiarism and to help students write academic papers more skillfully ([http://www.unicheck.com](http://www.unicheck.com)).
In addition to determining the percentage of “originality” and “similarity” in the submitted paper, the software also has other important features such as spell checker, grammar checker, online editing, and automatic tips for proper citation (http://www.unicheck.com).

Appropriate references for the use of Unicheck Plagiarism Detection will appear in the course syllabus.

**University Rules and Regulations for Conduct**

The Graduate Student Handbook explains the rules and regulations of the University, defines standards of personal and academic conduct expected of students, describes disciplinary procedures and actions, and explains how students may have grievances heard and remedied.
SECTION IV: ACADEMIC POLICIES AND PROCEDURES

Academic Integrity Policy

The University of Mobile has established a policy for students regarding academic integrity. The School of Nursing adheres to this policy as it relates to academic dishonesty by nursing students.

Students attending the University of Mobile are expected to reflect a high standard of academic integrity and conduct in accord with basic Christian principles and the mission of the University. Any student found to be disruptive in class, or copying, plagiarizing (with or without an intent to deceive), cheating, engaging in unauthorized use of a test, forging or falsifying records (self or patient; university, or clinical agency), or lying to a faculty member in order to complete a course assignment will be subject to disciplinary action.

The following are violations of Academic Integrity Policy

1. Cheating:
   - Unauthorized use of any materials, notes, sources of information, study aids or tools during an academic exercise. No cell phone, calculators, palm computers or hats allowed during exams.
   - Unauthorized assistance of a person, other than the course faculty during an academic exercise.
   - Unauthorized viewing of another person’s work during an academic exercise.
   - Unauthorized securing of all or any part of assignments or examinations in advance of the submission by the faculty.

2. Fabrication/Falsification:
   - The unauthorized invention or alteration of any information, citation, data or means of verification in an academic exercise, official correspondence of a university record, client record, or other professional documentation.
   - Failure to report errors in the clinical area.
   - Falsifying patient/client records by charting incorrect data or removing data.
   - Releasing confidential information about patients/clients to persons who do not have the right to such information.
   - Rude, abusive, or unprofessional language to patients/clients, agency personnel, faculty.
   - Jeopardizing a patient’s/client’s safety.

3. Plagiarism:
   - Submitting as one’s own work or creating any material or an idea wholly or in part created by another. This includes, but is not limited to:
     - Oral, written and graphical material.
     - Both published and unpublished work.
• Any material(s) downloaded from the internet.

4. Complicity:
   Helping or attempting to assist someone to commit an act of academic dishonesty.
   • Conveying test information to other students.
   • Reproducing information in duplicate for course assignments.

5. Unprofessional behavior (verbal or written, virtual or live):
   • Disrespectful to faculty, staff, or peers.
   • Use of inappropriate language.
   • Lack of accountability or responsibility for actions.
   • Disregarding the well-being and needs of patients: acts of commission or omission that could adversely affect the patient, e.g., medication errors, failure to provide safe and appropriate care, failure to follow preceptor/faculty instructions, breach of client confidentiality.
   • Discriminatory or culturally insensitive behavior.

6. Academic Performance:
   Any reason that may place the student at risk for dismissal such as:
   • Insufficient or lack of academic skills to support successful completion of graduate program of study.
   • Inconsistent or minimal participation in coursework.
   • Poor writing or verbal communication skills.
   • Frequent requests for exceptions or special accommodations not related to a documented disability.

Each faculty member has the responsibility of defining academic expectations at the beginning of each session. If a faculty member discovers a student violating the academic integrity code, they must either 1) assign a grade of “0” for the test or assignment if the infraction relates to an academic assignment; and/or 2) refer the incident to the Graduate Faculty Committee. After committee members complete the investigation, the incident, along with supporting evidence, is to be reported in writing to the Vice-President for Academic Affairs with a copy mailed to the student.

The office of the Vice-President for Academic Affairs determines whether the incident is the student’s second offense and, if so, refers the matter to the Academic Affairs Committee for disciplinary action. A student found guilty of a second offense is subject to academic suspension for up to one academic year. A third offense will result in academic dismissal. The student is entitled to appeal any case involving allegations of academic dishonesty or misconduct, in keeping with the appeal process as outlined.

Falsification of medical records may have legal consequences for which the student may be held accountable.

University of Mobile School of Nursing Graduate Student Handbook 41
**Academic Misconduct**

Academic integrity is a responsibility of each student attending the University of Mobile. Plagiarism, cheating, falsifying records (self or patient, university, or clinical agency), lying and any other of academic dishonesty are intolerable. The Graduate Faculty Committee will discipline any student, participating in any form of academic dishonesty, after a thorough review.

**Academic Probation**

All graduate students must maintain a GPA of at least 3.0 to be considered in good standing and to be eligible for graduation. A student who’s GPA falls below 3.0 after attempting twelve or more semester hours on course work will be placed on academic probation for the next semester. While on academic probation, the student is responsible for scheduling regular meetings with his advisor. The semester the student is on probation a minimum grade of a “B” and a semester GPA of 3.0 must be achieved. The student will remain on academic probation until the overall GPA is greater than 3.0.

Students who fail to attain the 3.0 GPA during the probationary period are subject to dismissal from their program. Students who earn two “C” grades will be dismissed from their program.

The School of Nursing reserves the right to require withdrawal from nursing of any graduate student whose health, academic record, clinical performance, or behavior is judged unsatisfactory or potentially unsafe.

**Adding, Dropping, or Withdrawing from Classes**

During specified periods each semester, students may add, drop or withdraw from a course (see the Academic Calendar page from the Registrar’s Office). Students must consult with the academic advisor prior to adding, dropping, or withdrawing from a course.

If a student chooses to drop a course after the last official day to drop a course, a grade of “F” will be recorded on the student’s transcript.

Students who withdraw from a FNP specialty course (NU 510, Family Nurse Practitioner I: Care of Children; NU 511, Family Nurse Practitioner II: Care of Adults; NU 512, Family Nurse Practitioner III: Care of Women; and/or NU 513, Specialty Focus Practicum) will be unable to apply completed clinical hours to the total required clinical hours for graduation from the FNP program. Students must repeat the entire clinical course regardless of the juncture of withdrawal or the reason for the withdrawal.
Admission Paths

• Regular Admission
  Admission is granted to students who have completed all requirements of the application process and who have demonstrated an acceptable level of academic achievement in their undergraduate degree program, including meeting program specific, minimum GPA requirements and demonstrating preparedness for work at the graduate level in their field of specialization.

• Early Assurance Admission
  Academically excellent undergraduate students may be eligible for the MSN Early Assurance Admission, an accelerated pathway to the MSN degree. This program permits students in the University of Mobile BSN program to apply for admission to the MSN and have their place reserved in the highly competitive Master's of Science in Nursing program. Inclusion in this program is contingent upon maintaining a GPA of 3.0, successfully completion of NCLEX, and evidence of leadership and professional behavior throughout the BSN program.

Admission Standards and Requirements

Applications for admission to the Master of Science degree tracks must meet all University requirements and be accepted for admission to graduate study by the School of Nursing. Upon acceptance for graduate study by the university, students may then apply to the School of Nursing for admission to the graduate program. Admission to the School of Nursing is competitive and will be based on evaluation of the applicant’s overall academic qualifications.

The University of Mobile and the School of Nursing accepts students on the basis of academic qualifications, character, and evidence of the potential to benefit from the university experience. The University accepts all qualified applicants without regard to race, religion, place of national origin, sex, age, or ethnic group.

Admission Requirements for the Master’s Program in Education/Administration BSN to MSN Track:

• Submission of application.
• Submission of official transcripts of all college coursework from all institutions attended.
• International Students
  o Students with international transcripts must provide an evaluation from Commission on Graduates of Foreign Nursing Schools (http://www.cgfns.org) for previous nursing coursework.
  o Students with international transcripts must provide evaluation from World Education Services (http://www.wes.org) for previous
non-nursing coursework.
  o International students must show proof of English proficiency. Applicants should request that official TOEFL test scores be sent directly to Enrollment Services.
  • Completion of BSN degree from a regionally accredited education institution.
  • Minimum cumulative GPA of 2.5.
  • Must hold and maintain an unencumbered license to practice as a Registered Nurse.
  • Submission of a clear background check.
  • Submission of Health History and record of required immunizations.
  • A personal interview with the Graduate Admissions Committee of the School of Nursing may be required, if requested.

Admission Requirements for the Master’s Program in Family Nurse Practitioner BSN to MSN Track:

• Submission of application.
• Submission of official transcripts of all college coursework from all institutions attended.
• International Students
  o Students with international transcripts must provide an evaluation from Commission on Graduates of Foreign Nursing Schools (http://www.cgfns.org) for previous nursing coursework.
  o Students with international transcripts must provide evaluation from World Education Services (http://www.wes.org) for previous non-nursing coursework.
  o International students must show proof of English proficiency. Applicants should request that official TOEFL test scores be sent directly to Enrollment Services.
• Completion of BSN degree in Nursing from a regionally accredited educational institution.
• Minimum cumulative GPA 3.0 on last 60 hours of academic coursework.
• Must hold and maintain an unencumbered license to practice as a Registered Nurse in which the student will complete FNP clinical experiences.
• Minimum of one (1) year of clinical experience preferred but not required.
• Submission of a clear background check.
• Submission of Health History and record of required immunizations.
• Submission of record of American Heart Association BLS Health Care Provider Certification.
• A personal interview with the Graduate Admissions Committee of the School of Nursing may be required, if requested.

Other Items Needed:
• Three reference forms from:
• A current clinical supervisor or nurse manager who has direct knowledge of the applicant’s skills in the clinical setting and how they will translate into the Family Nurse Practitioner role.
• A professor, faculty member or academic advisor who can provide a meaningful assessment of the applicant’s academic record.
• A practicing clinical nurse professional, or APRN, who has served as a mentor and can speak about the applicant’s abilities as a nurse and potential to become a Family Nurse Practitioner.

• Current Curriculum Vita or Resume is required. The document should include:
  o Educational background including institutions, degree(s) awarded, degree(s) in progress, dates of degree(s) awarded and/or anticipated date of receiving degree(s).
  o Relevant employment history, including:
    ▪ Job title, job description, and relevant duties performed.
    ▪ Employment dates of each position.
  o Community service or volunteer experience.
  o Any awards, publications, presentations, memberships, or honors.
  o Evidence of leadership and career progression.

• Personal statement of no more than two pages discussing:
  o How your previous education, experience and professional interests have prepared you to be successful in the Family Nurse Practitioner Program.
  o Your professional goals and how completing the family nurse practitioner track will help you achieve your professional goals.
  o Your understanding of the family nurse practitioner role and your intentions regarding service in primary care practice.
  o How have you prepared for success in this program.
  o Your essay should be clear, succinct, and double-spaced.

Required Pre-requisites
• Statistics if not successfully completed in BSN degree.

Advising Responsibilities

Advising is an integral part of the student experience at the University of Mobile. It is a collaborative process in which students are expected to assume primary responsibility for their academic planning while faculty advisors provide expertise and support in the process.

A student accepted into one of the graduate nursing programs will be assigned a faculty advisor. Upon enrollment, each student is assigned a faculty advisor to assist the student with academic concerns, planning the program of study, and assuring that graduation requirements are met. Prior to the first semester of graduate study, the student will make a plan of study with their advisor. Education is ultimately the responsibility of the learner, but the advisor's input to the student's plan of study
and semester schedule enhances student awareness of how each course contributes to overall progress towards graduation.

Responsibilities of the Faculty Advisor include:

- Develop an individualized plan of study with the student to meet the student’s academic professional goals based on current curricular guidelines.
- Communicate with the student to facilitate registration (e.g., discuss changes in courses, overall program, approve course selections).
- Keep informed of student progress through:
  a. Communicating with the student.
  b. Communicating and discussing progress with other faculty members.
  c. Monitoring grades and academic standing each semester.
  d. Referring the student to the appropriate campus resources if requested.
  e. Communicating with the Dean and/or the Academic Vice-President for course waivers, transfer credits, and course substitutions.

Responsibilities of the Student Advisee:

- Clarify with the faculty advisor their preferred method of contact (email or telephone), virtual or office hours, and when to expect a response to email or voice mail.
- Communicate with the faculty advisor any concerns regarding course registration.
- Contact the faculty advisor if they wish to change the sequence of their plan of study.
- Communicate with the faculty advisor in case of academic difficulty, interruption in program, or potential change in academic status.
- Contact the faculty advisor if their cumulative GPA for the semester is less than 3.0.
- Contact the faculty advisor for questions about campus resources to assist them with their academic work.
- Maintain regular contact with the faculty advisor via email, telephone, or face-to-face meetings.

**Comprehensive Examination for MSN Education/Administration Students**

During the last semester of the Master of Science in Nursing (MSN) Education/Administration program, a comprehensive examination will be given incorporating concepts from Nursing Education, Nursing Administration, and Research. The criteria for taking the Comprehensive Examination include: 1) the student must be able to complete all degree requirements at the end of the semester in which the exam is given, and 2) the student must have a minimum of a 3.0 GPA in all courses taken within the major. The examination will be scheduled by the graduate faculty and students will be given at least two (2) months notification.
The test will be read by a panel of three graduate faculty members and will be graded as “Pass” or “Fail.” Students must pass the examination(s) to qualify for graduation. The examination may be repeated one time.

**Dismissal from the Graduate Program**

When a student is recommend for dismissal from the nursing program, the Graduate Program Chair will provide a written notification of dismissal. Students will be recommended for dismissal from the graduate nursing program under the following conditions:

- Earning a grade less than a “B” in two different nursing courses or in one repeated nursing course.
- Withdrawing from more than two nursing courses.
- Exhibiting conduct that is unprofessional, incompetent, unethical, or illegal in the classroom or clinical settings as outlined by the American Nurses’ Association Code for Nurses and/or School of Nursing clinical policies.
- Cheating on course examinations, plagiarism or improper documentation or falsification of clinical records or activities.
- The School of Nursing retains the right to permanently dismiss from the program any student who is deemed to violate the policies and procedures of the School of Nursing; policies and procedures of clinical and affiliating facilities; professional behavior; and/or policies of confidentiality.

**Evaluation of Nursing Programs**

The faculty believes that a systematic ongoing evaluation is essential to the development of an educationally sound academic program. Methodical evaluation promotes the search for effective, efficient, and innovative approaches to learning and results in the continuing improvement of the educational program. It provides a basis for making decisions regarding program modifications and changes, resulting in the continuing improvement of the education program. The purposes of program evaluation are to:

1. Determine to what extent students are prepared to meet the objectives of the professional program.
2. Promote continuous improvement in the overall program.
3. Encourage personal/professional growth and responsibility of faculty and students through participation in the evaluation of the educational program.

Students participate in the evaluation process by providing written evaluations of all nursing courses. Students also have opportunities to share information through student representatives on the Graduate Faculty Committee and through other informal channels of communication. Students are also asked to complete an end-of-program evaluation at the time of graduation.
Grading

Grades are earned through completion of course requirements. Points are awarded based on the level of achievement of expected outcomes. Earned points for each learning activity (examination, written assignment, presentation, etc.) are posted on the MyUM Gradebook through the course. Students are responsible for tracking their own progress. Questions or concerns regarding grades earned should be addressed to the course faculty within one week of the grade posting.

There is no rounding of test/exam grades in the nursing program. All grades will be recorded through the one hundredth (e.g. 81.27, 68.50, 80.10). At the end of the course the grades will be averaged as specified in the course syllabus with the final grade determined to the nearest one hundredth (79.98 would not be considered a passing grade).

Final grades will not be rounded up or down, i.e., 89.99% will be assigned a grade of a “B”. Extra credit opportunities are not available at the graduate level.

Course grades are earned by the student based on an accumulation of total possible points in a course. This is individualized based upon the instructor’s plan for the course. Some assignments may be recorded as a percentage of the total grade. If there are questions or concerns, the student should refer to the course syllabus and consult the course faculty member.

The instructor makes the final decision on a test/exam grade. If the student believes a course grade is unfair, this may be discussed with the instructor, the Graduate Program Chair, and the Dean. The student appeal process should be followed in the appropriate sequence and is outlined in the School of Nursing Graduate Student Handbook.

Grading Scale

A grade of B (80%) or better is required to pass graduate level nursing courses in the School of Nursing at the University of Mobile. Final grades are computed according to the following standard based on a total of 100%.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>90-100</td>
</tr>
<tr>
<td>B</td>
<td>80-89</td>
</tr>
<tr>
<td>C</td>
<td>70-79</td>
</tr>
<tr>
<td>D</td>
<td>60-69</td>
</tr>
<tr>
<td>F</td>
<td>&lt;60</td>
</tr>
</tbody>
</table>
The Grade Point Average (GPA) is calculated by the registrar's office:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
</tbody>
</table>

**Grievance Policy and Process**

The School of Nursing follows a Grievance Procedure for the resolution of formal student complaints or concerns. Formal complaints must be made in writing to the Dean of the School of Nursing and the Graduate Programs Chair. The formal complaint must include specific information, including the nature of the complaint and evidence supporting of the complaint. An investigation is initiated within seven (7) days of receipt. In cases of alleged arbitrary, inconsistent, or discriminatory grading, the following review process will be followed in the School of Nursing:

1. In on-campus courses, the student will request a meeting with the course faculty to review the basis for the grade. In online courses, the student will request an online or telephone conference with the faculty to review the basis for the grade.
2. If the student is not satisfied with the meeting or conference with the course faculty, the may appeal to the Graduate Program Chair. The Graduate Program Chair will seek to mediate the issue between the student and the course faculty.
3. If the student is unsatisfied with the findings and recommendations by the Graduate Program Chair, the student may appeal to the Dean of the School of Nursing. The Dean will meet with the student, confer with the course faculty member, and then make the final decision. The student should be notified of the decision within fourteen (14) days of submission of their formal complaint.

**Incomplete Grade Policy**

A written request for a grade of incomplete ("I") is initiated by a student when students are unable to complete the work for a course due to reasons beyond their control (hospitalization, serious physical and mental health issues, death of spouse/child/parents), etc.). The grade of "I" is only given in cases where the incomplete is unavoidable and legitimate. Students may be required to provide formal documentation to support an incomplete grade request. Students may not request an incomplete due to failing course grades or poor course performance.

An “Incomplete Grade Form” that includes the reason for the incomplete, the work that must be completed to earn a final course grade and the required completion date is generated when an “I” is submitted as a course grade. The completion date must be no later than the last day of the next scheduled academic term. The “I” is a temporary grade and will be automatically converted to an “F” if the course has not
been completed by the end of the next scheduled academic term. Extensions beyond one scheduled term are not allowed for graduate courses. Students who seek an incomplete grade will not be permitted to continue in their curriculum sequence until the incomplete grade is converted to a numerical grade.

**Limitation in Completion of Requirements**

Graduate students in the MSN Education/Administration Track must complete all degree requirements within six (6) years. Graduate students in the Family Nurse Practitioner Track must complete all degree requirements within a six (6) year period. Time limits shall be computed from and include the first semester of credit applied to the degree program. Students who do not enroll for two (2) consecutive semesters are subject to all program requirements, policies, and guidelines in place at the time of re-enrollment.

**On-Campus Focus Sessions for Family Nurse Practitioner Program**

An on-campus Focus Session is scheduled twice an academic year to provide hands-on learning experience with opportunities to meet faculty and become acquainted with cohort classmates while engaging in learning activities and completing competency requirements. Focus sessions extend over a period of 1-4 full days, 8:30 AM to 4:30 PM.

Focus Sessions are mandatory to achieve course expectations and program outcomes. Failure to satisfactorily complete a required Focus Session will result in the delay of program progression.

All FNP students are emailed complete Focus Session details well in advance of each session. Students are responsible for making their own housing and transportation arrangements. There are no housing facilities available on campus. A list of hotel recommendations may be requested. The School of Nursing provides continental breakfast and lunch each day.

All university facilities are available to students during the Focus Sessions. The computer lab is open and free for student use. Wireless access is also available throughout the School of Nursing building.

**Progression**

Within the School of Nursing, students must fulfill the requirements for theoretical/didactic and clinical course components of the graduate curriculum, demonstrate academic integrity and ethical conduct, and maintain a level of health which contributes to their meeting course objectives. The faculty in the School of Nursing will impose academic probation or dismiss students from the graduate nursing programs as deemed appropriate. Progression occurs when a student successfully completes and passes all courses taken in the academic semester.
Academic probation may be imposed to monitor and support the student’s progression through the graduate program of study.

Students enrolled in a graduate nursing program at the University of Mobile are required to maintain a cumulative grade point average (GPA) of 3.0 in all courses taken toward the degree. Students not meeting the minimum academic standard will be placed on academic probation.

Grades of “C” or Below
In addition to meeting the 3.0 GPA requirement for graduation, graduate students must have no more than one (1) grade of “C”. Students earning a grade of “C” will receive a written academic warning and will be placed on academic probation.

Students earning a second grade of “C” in a concurrent or subsequent course will be academically dismissed and will be ineligible to apply for readmission to any graduate program in nursing at the University of Mobile.

Students earning a grade of a “D” or “F” or “Unsatisfactory” will receive an academic dismissal and will be ineligible to apply for readmission to any graduate program in nursing at the University of Mobile.

**Readmission after Dismissal/Appeal**

Students who have more than two (2) C’s will not be considered for re-enrollment. Dismissals due to academic misconduct or grades of “D” or “F” are not eligible to appeal for readmission. Students withdrawing from more than two (2) nursing courses, exhibiting unprofessional or illegal behaviors in the classroom or clinical setting, and/or violating academic integrity policy will not be eligible to be considered for re-enrollment or readmission.

**Readmission After Voluntary Withdrawal or Transfer**

A student who leaves the university and/or School of Nursing in good standing through voluntary withdrawal or a student from another nursing program who left in good standing and desires to transfer to the University of Mobile nursing program may be evaluated for readmission under the following circumstances:

1. Complete an application for readmission to the School of Nursing.
2. At the time of application for readmission, submit a statement, which addresses the reason for the withdrawal or transfer, outlines what will be done by the student to ensure success in the School of Nursing, and discusses why the student should be given consideration be re-admitted. The statement must be written by the student.
3. The student will be required to have a personal interview with the Graduate Admission’s Committee and Dean. The student’s complete academic record, including all clinical evaluations will be reviewed.
4. Readmission is not automatic or guaranteed. Students will be considered as part of the total applicant pool.
5. The requirements for completion of program/major requirements within six (6) years of initial enrollment will be in effect for readmitted students.

Students who have not been re-enrolled for a time period longer than two (2) consecutive semesters must reapply for admission. Student petitions for reactivation will be considered only one time during their program. Students approved for readmission may be placed on probationary status at the discretion of the Graduate Program Chair and the Graduate Faculty Committee.

**Registering for Classes**

Newly admitted or re-enrolling (those who are not currently enrolled) graduate students should enroll in courses during designated UM registration periods. Students are responsible for contacting their faculty advisor each semester to register and enroll in courses according to their program of study. The dates for registration are widely publicized.

- Upon acceptance in the UM School of Nursing, students need to consult with the academic advisor to develop a program plan specific to their degree program and area of study.
- Students must have an approved program plan on file in the UM School of Nursing. The student’s academic advisor must approve any change in the program plan.
- Any change in the program plan may result in the course(s) being unavailable and may delay graduation.
- All graduate students must register on the computer through MyUM (See MyUM for First-Time Users.)

The MSN curricula are subject to change based upon professional or accreditation standards and/or national certification requirements. Students will be notified when changes occur.

**Research Component for MSN Education/Administration Track**

Each student in the Master in Science in Nursing (MSN) Education/Administration Track must complete a thesis or a research project. The proposal for either the thesis or the research project will be started in NU 504, Research Methodology. All students must complete NU 504 or its equivalent prior to registering for NU 598, Research Project or NU 599, Thesis. Completed papers must be written in the American Psychological Association (APA) format. Students should purchase the American Psychological Publication Manual, latest edition, for use throughout the graduate curriculum. The thesis or research project should be in progress by the fall semester prior to the spring graduation.
The thesis or the research project proposal must first be approved by the faculty research advisor/thesis committee and then by the University of Mobile Institutional Review Board (IRB) prior to registering for NU 598 or NU 599. The School of Nursing requires that all students involved in human subjects research complete the IRB form to ensure the protection of human research subjects.

The project advisor or committee chairman will assist the student in setting realistic completion dates for each step in the research process. Students should submit typed work to their advisor or committee at least ten (10) working days before seeking feedback. It is the student's responsibility to seek feedback from the faculty. The final paper with all thirty (30) days prior to the last day of the semester. The oral defense of a thesis must be scheduled at least two (2) weeks prior to the last day of the semester.

**Research Project**
The research project is a scholarly endeavor, designed and implemented by the student. The course faculty will disseminate the Research Project Guidelines. Three (3) semester hours of graduate credit may be granted for the research project option. The student is assigned an advisor from the graduate nursing faculty. The advisor must approve the final research project. Completed research projects must be submitted in journal format according to guidelines of an appropriate professional refereed nursing journal.

**Thesis**
A thesis gives evidence of a student's ability in research, interpretation of data, and use of a standard format. The course faculty will disseminate the Thesis Guidelines. Three (3) semester hours of graduate credit may be granted for the thesis option. An oral defense of the thesis is required. The thesis committee of three is to be selected by the student from the graduate faculty. The chairman and at least one committee member must be from the School of Nursing faculty. The committee and the Graduate Program Chair must approve the completed thesis.
SECTION V: CLINICAL POLICIES AND PROCEDURES

Administrative Drop Policy for Failure to Submit Clinical Practice Requirements

It is imperative that all graduate students are in compliance with clinical practice requirements for Code of Conduct, Immunizations, RN Licensure, CPR certification, Criminal Background Check and Drug Screen, etc. Students enrolled in a course that contains a clinical component (i.e., has clinical hours required as part of the course) are required to ensure all requirements are submitted and are up to date. Students who fail to submit or update indicating evidence of compliance with required items within the first week of the semester may be administratively dropped from the clinical course for which they are registered.

The course instructor or Graduate Program Chair may initiate the administrative drop process if a student does not upload all required document to CastleBranch.

The process for administratively dropping a student for failure to submit evidence of the above requirements will be as follows:

1. The Administrative Assistant in the School of Nursing will provide a compliance report to the Graduate Program Chair the week before the semester term commences. If a student has failed to submit the documents required by the School of Nursing (complete and up to date), the course instructor will contact the student via UM email, reminding the student of the submission requirement and notifying the student they are out of compliance. The student will be given seven (7) days to submit the required documents.

2. If the student fails to respond to the email directive or fails to submit the required documents or notifies the course instructor of their intent to rectify the situation, the instructor will notify the Graduate Program Chair and the School of Nursing Dean requesting that the student be administratively dropped from the course and that their access to the course be removed.

Clinical Agency Agreements

The UM School of Nursing has a legal responsibility to have written agreements with each agency used for clinical practice. The Clinical Agency Agreements are established and maintained through the office of the School of Nursing Dean.

The agreements delineate the University’s responsibility with the clinical agencies when students and faculty are present. The UM School of Nursing and clinical agencies assume shared responsibilities for the students’ educational experiences in the clinical setting. Selected portions of the clinical agreement directly related to student responsibility are as follows:
• The university will instruct all nursing students assigned to the clinical agency regarding confidentiality of medical records and patient/client data imparted during the educational experience.
• The university will not allow students to participate in clinical experiences who have not documented their proof of immunization for tetanus, diphtheria, and polio; Hepatitis B series; Tuberculin Skin Test (chest x-ray if appropriate); proof of immunity to rubella, chickenpox and MMR.
• If the clinical agency deems a student’s performance to be unsatisfactory and detrimental to its health care responsibilities, it may suspend the student from utilizing the clinical agency for clinical experience. The faculty will conduct an investigation and decide appropriate disciplinary action.
• The nature of this cooperative agreement is such that each party undertakes obligations to the other without passage of funds between the University and the clinical agency or between the personnel of their respective staffs.

Students are responsible for securing their own clinical placements within their geographical region. Clinical experiences are done in the students geographical area based on the requirements of the course. Clinical experiences for the FNP program will be done in primary care and clinic settings. Students who reside in rural areas may have limited options in securing clinical placement, and students who live in an area that has numerous graduate nursing programs may have more competition in securing clinical placements.

Students must submit for approval their chosen clinical site at least sixty (60) days prior to the beginning of their clinical experience. This time is needed to ensure that University of Mobile School of Nursing can secure a Clinical Agency Agreement with the health care institution if one does not currently exist. The process can be time intensive because lawyers from both institutions must approve the affiliation contract.

A Clinical Agency Agreement must be signed and on file at the University of Mobile School of Nursing prior to any clinical activity. This agreement must be in place for each clinical site, where hands-on care is provided, no matter how many hours will be completed at the site.

**Clinical Attendance and Absence Policy**

All students are required to notify their faculty and/or preceptor’s of their absence from a clinical experience. The student will adhere to the faculty and/or preceptor’s request for notification, contacting them by telephone, email, or text message. Faculty and/or preceptors should be notified of the student’s absence at least two (2) hours prior to their scheduled clinical time (i.e., student due to commence work at 9:00 am, the faculty and preceptor should be notified by 7:00 am). Students in the Graduate Nursing Program are expected to exemplify professional behaviors and appropriate notification of their clinical absence is required. Students who fail to timely and appropriately notify their faculty and preceptor will receive a written
reprimand that will be placed in the student’s permanent record. Repeat violations will result in disciplinary actions, including grade penalty.

**Clinical Course Expectations**

The student must be prepared for all clinical learning opportunities. The student must comply with clinical course expectations:

1. Assure that there is a Clinical Agency Agreement in place with the clinical site prior to performing any clinical rotations.

2. Arrive on time to all clinical rotation experiences; being well-rested and prepared.

3. Properly identify yourself to all patients and other health care providers as a University of Mobile School of Nursing Family Nurse Practitioner student.

4. Adhere to the School of Nursing professional dress code and wear a cleaned and pressed lab coat with the school identification badge in clear view.

5. Participate in clinical practice as a Family Nurse Practitioner student only under the supervision and direction of an approved preceptor and/or a University of Mobile faculty member.

6. Actively seek learning experiences guided by the approved preceptor.

7. Perform only approved procedures that are within the scope of practice as a Family Nurse Practitioner and only under the direct supervision of an approved preceptor and/or faculty member.

8. Elicit an appropriate health history and perform a comprehensive physical examination in a professional manner.

9. Identify and respond appropriately to abnormal findings from the history and physical, physical examination, and other diagnostic data.

10. Verify and discuss all findings, suspected diagnoses, recommended treatment, and plans of care with the preceptor prior to implementation.

11. Document findings in a concise, organized, and accurate manner using correct medical terminology and clinical agency or institutional guidelines.

12. Always maintain patient confidentiality.

13. Provide health promotion and disease prevention education to patients across the lifespan in an appropriate manner.

14. Recognize that some problems are outside the Family Nurse Practitioner scope of practice; identify when a client should be referred to a physician, specialist, or other health care facility for management.

15. Collaborate with other health care professionals in coordinating care as needed.

16. Recognize emergency situations and initiate effective emergency care when needed.

17. Communicate effectively with preceptor, faculty, and other members of the health care team.

18. Notify your faculty member and preceptor immediately for any problems, issues, or concerns that arise in the clinical area.

19. Demonstrate behavior that is both ethical and professional at all times.

20. Demonstrate safety at all times in clinical practice.
Clinical Hour Requirements for MSN Education/Administration Courses

The University of Mobile School of Nursing recognizes that clinical practice requirements are essential to the education of nurses in advanced practice nursing roles. Specific courses within the Education/Administrative Program (NU 531, Administration of Nursing Practicum and NU 541, Teaching Nursing Practicum) require students to participate in clinical experiences at an accepted clinical site with an approved preceptor. Students must complete a total of ninety (90) clinical hours per course.

All clinical hours are to be completed during the semester in which the student is enrolled. No clinical hours may be completed after the last day of the course. Students should be prudent and timely in securing clinical sites.

Clinical Hour Requirements for Family Nurse Practitioner Courses

The University of Mobile School of Nursing recognizes that clinical practice requirements are essential to the education of nurses in advanced practice nursing roles. Family Nurse Practitioner students are required to complete 560 faculty/preceptor supervised clinical hours in their program of study. These hours are divided into specialties as described in each clinical course syllabus (NU 510, Family Nurse Practitioner I; NU 511, Family Nurse Practitioner II; NU 512, Family Nurse Practitioner III, and NU 513, Specialty Focus Practicum). Clinical hours must be spent with an approved preceptor, at an approved site.

The MSN-FNP courses that include clinical experience opportunities are:
- NU 510 Family Nurse Practitioner I: Care of Children (160 clinical hours)
- NU 511 Family Nurse Practitioner II: Care of Adults (160 clinical hours)
- NU 512 Family Nurse Practitioner III: Care of Women (160 clinical hours)
- NU 513 Specialty Focus Practicum (80 clinical hours)

The Commission on Collegiate Nursing Education (CCNE), supports the requirement of a minimum of 500 supervised direct patient care clinical hours in a FNP program to “address Nurse Practitioner competencies in the preparation of the NP role and population-focused area” (Key Element II-E of the CCNE Standards for Accreditation of Baccalaureate and Graduate Nursing Programs, 2016).

Direct Patient Clinical hours are defined by the National Task Force (NTF), Criterion III.E (2016) as “hours in which direct clinical care is provided to individuals and families in one of the six population-focused areas of NP practice; these hours do not include skill lab hours, physical assessment practice sessions, or a community project if it does not include provision of direct patient care. Clinical
experiences and time spent in each experience should be varied and distributed in a way that prepares the student to provide care to the populations served.”

To complete the 160 clinical hours required for NU 510, NU 511, and NU 512, students must plan to spend an average of two (2) days a week at their approved clinical site (approximately 12-15 hours a week). Often, preceptors may take a day off for a vacation, illness, holiday, or for a personal issue. It is important that students plan their schedules accordingly to ensure that they are able to complete the clinical hour requirement with the designated time frame.

Indirect clinical time (e.g., on-campus activities or participation in Focus Sessions) and simulation hours are not counted in the total number of hours required for advanced practice certification. Clinical hours must involve direct contact with patients/clients. According to the National Task Force on Quality Nurse Practitioner Education, Criterion III.E., “Simulation experiences may only be counted as clinical hours over and above the minimum 500 direct patient care clinical hours.”

Therefore, students should not count on-campus activities as clinical time for specialty clinical courses (NU 510, NU 511, NU 512, and NU 513). Clinical time does not include luncheons, observing hospital rounds, or seeing patients outside of the assigned patient population for the assigned course. “Direct patient care involves assessment, diagnosis, treatment, and evaluation of a real client/patient, not simulations or lab exercises with trained patient actors” (NTF Criteria, 2016).

All clinical hours are to be completed during the semester in which the student is enrolled. No clinical hours may be completed after the last day of the course.

**Clinical Practice Experiences**

The Commission on Collegiate Nursing Education defines clinical practice experiences “as planned learning activities in nursing practice that allow students to understand, perform, and refine professional competencies at the appropriate program level. Clinical practice experiences may be known as clinical learning opportunities, clinical practice, clinical strategies, clinical activities, experiential learning strategies, or practice” (CCNE Standards for Accreditation of Baccalaureate and Graduate Nursing Programs, 2016).

**Clinical Practice Preparation**

Students are responsible for securing their own clinical placements within their geographical region. Clinical experiences are done in the students geographical area with a preceptor selected based on the requirements of the course. Clinical experiences for the Education/Administration Program will be done primarily in hospitals or academic settings. Clinical experiences for the Family Nurse Practitioner Program will be done in primary care and clinic settings.
Students may utilize currently approved preceptors and agencies in their local area, or submit new preceptors and agencies for review and approval. Students may find there is competition for clinical preceptors; therefore, early planning is imperative. Students who reside in rural areas may have limited options in securing clinical placement and students who live in an area that has numerous graduate nursing programs may have more competition in securing clinical placements. It is recommended that students start planning clinical experiences at least the semester prior to taking the scheduled course.

A Clinical Agency Agreement must be signed and on file at the University of Mobile prior to any clinical activity. This agreement must be in place for each clinical site, where hands-on care is provided, no matter how many hours will be completed at the site.

**Clinical Practice Expectations for Education/Administration Program**

The student and the course faculty member are responsible for determining the work to be done to meet the course requirements. During your clinical practicum courses (NU 531 Administration of Nursing Practicum or NU 541, Teaching Nursing Practicum), the student is expected to meet the following requirements:

- Discuss course objectives and clarify goals for clinical experience with your preceptor. Provide a written copy of approved goals and objectives to the preceptor prior to the beginning clinical hours.
- Negotiate clinical schedule and activities, as appropriate. Students should arrive in clinical areas on the negotiated dates and times.
- Discuss and provide preceptor with copy of the tool used to assess your clinical performance.
- Comply with the policies of the healthcare agency and the UM School of Nursing, including pre-clinical compliance paperwork, training, professional attire, and identification.
- Maintain regular contact with faculty member and inform the course faculty member promptly when problems related to the clinical experience arise.
- Keep all scheduled appointments with preceptor and faculty.
- Maintain a record of clinical hours through Typhon.
- Maintain nursing skills checklist through Typhon and bring all required equipment that is necessary for providing patient care (stethoscope, watch, mobile device for reference, etc.).
- Adhere to all HIPPA and HITECH guidelines of patient confidentiality.
- Evaluate their preceptor and clinical site at the end of their clinical experience.
- Complete 90 clinical hours for NU 531, Administration of Nursing Practicum and complete 90 clinical hours for NU 541, Teaching Nursing Practicum.
Practicum according to the policies and guidelines as stipulated in the course syllabi.

Preceptor Responsibilities
• Agrees to serve as student preceptor; acts as a professional role model, resource person, and mentor.
• Completes and electronically submits Preceptor Application to course faculty one month prior to the student starting clinical hours.
• Approves and agrees to jointly set goals and objectives for the student’s clinical experience, as appropriate.
• Informs student and faculty of available learning activities and projects likely to fulfill the student’s learning objectives.
• Encourages initiative, individuality, self-assessment, and increasing autonomy, as appropriate, by the student.
• Shares expertise necessary to function in the clinical site.
• Provides regular feedback to student regarding progress, strengths and limitations.
• Completes assessment of student’s performance at mid-semester and at the end of the semester. Submits final student evaluation to faculty member within the specified course timeline.
• Confers routinely with faculty member directly regarding student’s progress during the clinical experience. Immediately notifies the faculty member if the student’s performance is unsatisfactory.
• Electronically submits or emails student evaluation directly to the faculty member. The student evaluation form must be on file before course completion.

Faculty Responsibilities
• Screens, approves, and/or assigns the preceptor.
• Assures all clinical requirements are complete prior to student beginning clinical hours.
• Provides course information to the preceptor, to include, course and/or clinical objectives, course timeline, and assessment criteria for student’s clinical performance.
• Monitors student performance regularly and identifies progress, strengths, and limitations that may impact student’s completion of the clinical requirements.
• Supervises all clinical learning opportunities. This can be accomplished through face-to-face meetings at the clinical site, employing the use of technology for the purpose of “visiting” the site, meeting (using various modalities) with the student and preceptor to determine how the student is progressing.
• Contacts students as needed during the semester to discuss their clinical performance and obtainment of course objectives.
• Contacts the preceptor regarding the student's performance a minimum of three (3) times during the semester and as needed.
• Utilizes a variety of data, including preceptor input to assign a final course grade.

Clinical Practice Expectations for Family Nurse Practitioner Program

The student and the course faculty member are responsible for determining the work to be done to meet the course requirements. During your clinical practice (NU 510, Family Nurse Practitioner I: Care of Children; NU 511, Family Nurse Practitioner II: Care of Adults; NU 512, Family Nurse Practitioner III: Care of Women; NU 513 Specialty Focus Practicum), the student is expected to meet the following requirements:

• Discuss course objectives and clarify goals for clinical experience with your preceptor. Provide a written copy of approved goals and objectives to the preceptor prior to the beginning clinical hours.
• Negotiate clinical schedule and activities, as appropriate. Students should arrive in clinical areas on the negotiated dates and times.
• Discuss and provide preceptor with copy of the tool used to assess your clinical performance.
• Comply with the policies of the healthcare agency and the UM School of Nursing, including pre-clinical compliance paperwork, training, professional attire, and identification.
• Maintain regular contact with faculty member and inform the course faculty member promptly when problems related to the clinical experience arise.
• Keep all scheduled appointments with preceptor and faculty.
• Maintain clinical hours, clinical site, and preceptor information as indicated by the course requirements through Typhon.
• Maintain a record of nursing through Typhon and bring all required equipment that is necessary for providing patient care (stethoscope, watch, mobile device for reference, etc.).
• Adhere to all HIPPA and HITECH guidelines of patient confidentiality.
• Evaluate their preceptor and clinical site at the end of their clinical experience.
• Complete 160 clinical hours for NU 510, Family Nurse Practitioner I: Care of Children; complete 160 clinical hours for NU 511, Family Nurse Practitioner II: Care of Adults; complete 160 hours for NU 512, Family Nurse Practitioner III: Care of Women; and complete 80 clinical hours for NU 513, Specialty Focus Practicum according to the policies and guidelines as stipulated in the course syllabi.
Preceptor Responsibilities
• Agrees to serve as student preceptor; acts as a professional role model, resource person, and mentor.
• Completes and electronically submits Preceptor Application to course faculty one month prior to the student starting clinical hours.
• Approves and agrees to jointly set goals and objectives for the student’s clinical experience, as appropriate.
• Informs student and faculty of available learning activities and projects likely to fulfill the student’s learning objectives.
• Encourages initiative, individuality, self-assessment, and increasing autonomy, as appropriate, by the student.
• Shares expertise necessary to function in the clinical site.
• Provides regular feedback to student regarding progress, strengths and limitations.
• Completes assessment of student’s performance at mid-semester and at the end of the semester. Submits final student evaluation to faculty member within the specified course timeline.
• Confers routinely with faculty member directly regarding student’s progress during the clinical experience. Immediately notifies the faculty member if the student’s performance is unsatisfactory.
• Electronically submits or emails student evaluation directly to the faculty member. The student evaluation form must be on file before course completion.
• Submits a record of the student’s clinical hours.

Faculty Responsibilities
• Screens, approves, and/or assigns the preceptor.
• Assures all clinical requirements are complete prior to student beginning clinical hours.
• Provides course information to the preceptor, to include, course and/or clinical objectives, course timeline, and assessment criteria for student’s clinical performance.
• Monitors student performance regularly and identifies progress, strengths, and limitations that may impact student’s completion of the clinical requirements.
• Supervises all clinical learning opportunities. This can be accomplished through face-to-face meetings at the clinical site, employing the use of technology for the purpose of “visiting” the site, meeting (using various modalities) with the student and preceptor to determine how the student is progressing.
• Contacts students as needed during the semester to discuss their clinical performance and obtainment of course objectives.
• Contacts the preceptor regarding the student’s performance a minimum of three (3) times during the semester and as needed.
• Utilizes a variety of data, including preceptor input to assign a final course grade.

**Clinical Site Selection Guidelines and Process for Education/Administration Program**

Clinical site selection is critical to the student’s success in the program. The student should have the clinical site information submitted to the appropriate faculty at least sixty (60) days prior to the end of the semester before the next clinical course. This time frame makes it possible for nursing faculty to determine if a Clinical Agency Agreement currently exists for the requested clinical agency and/or time to secure the contract.

Students are not permitted to select clinical practice experiences at their current place of employment. Students may not work under the direction of their supervisor or a subordinate. Approved preceptors must have no direct personal or professional relationship with the student.

If the student is employed by a large healthcare system, the clinical experiences can be completed at a separate clinical area (“the experiences must provide the opportunity for students to integrate new knowledge into practice and the experiences must be appropriate to the expected student learning and program outcomes” CCNE, Key Element II, 2016).

**Clinical Site Selection Guidelines and Process for Family Nurse Practitioner Program**

Clinical site selection is critical to the student’s success in the program. The student should have the clinical site information submitted to the appropriate faculty at least sixty (60) days prior to the end of the semester before the next clinical course. This time frame makes it possible for nursing faculty to determine if a Clinical Agency Agreement currently exists for the requested clinical agency and/or time to secure the contract.

Students are not permitted to select clinical practice experiences at their current place of employment. Students may not work under the direction of their supervisor or a subordinate. Approved preceptors must have no direct personal or professional relationship with the student.

If the student is employed by a large healthcare system, the clinical experiences can be completed at a separate clinical area (“the experiences must provide the opportunity for students to integrate new knowledge into practice and the experiences must be appropriate to the expected student learning and program outcomes” CCNE, Key Element II, 2016).
Clinical site selection is dependent upon the practicum experience for the student. Acceptable sites may include physician offices that focus on family practice, internal medicine, gynecological/obstetric care or children; pediatrician clinics; hospital based pediatric clinics; or urgent care clinics. Specific information related to preceptor selection will be discussed in the on-campus orientation held in the fall semester and will also be available in each clinical course syllabi.

**Illness or Injury at Clinical**

Students who are injured or become ill while providing patient care completing clinical hours must:

1. Notify the preceptor and course faculty member immediately.
2. Follow the agency’s policy and procedure for injury or illness, if appropriate.

Students should refrain from reporting to the clinical area when ill, experiencing an elevated temperature, experiencing nausea/vomiting, diarrhea or any other symptom indicative of illness or disease. Students should notify the preceptor and faculty member of their clinical absence at least two (2) hours prior to their assigned clinical time.

Clinical agencies are not compelled to provide medical care free of charge for students who become ill during the clinical experience. Students are responsible for any expense(s) incurred. All students are encouraged to maintain personal health care coverage.

**Nurse Practitioner Competencies**

Competencies are higher-level skills that represent the ability to demonstrate mastery over care management and that provide a foundation for decision-making skills under a variety of clinical situations across all care settings (See Appendices E, F, and G).

**Preceptor Selection Criteria for Education/Administration Program**

The Nurse Educator/Administrator Program relies on clinical preceptors for direct supervision of the practice experience. Preceptors include nurse educators and nurse administrators. These practicing professionals are the experts who guide the students in the Nurse Education/Administrator Program with day-to-day experiential learning, role model the most appropriate ways to approach students in an education or administrative setting, and provided feedback in a variety of clinical settings.

Serving as a clinical preceptor is an important, challenging, and rewarding activity, which requires time, attention, and consistent availability to students. Because the contribution of the preceptor faculty is so critical to the quality of the student nurse education or administration learning experience, it is essential that the faculty-
student-preceptor relationship be built on mutual respect, professional concurrence, and clear communication.

It is the student’s reasonability to make contact with a potential clinical agency to explore preceptorship opportunities (The Graduate Program Chair and faculty may assist in the process). Students should start early in securing appropriate preceptors. When contacting perspective preceptors or clinical site managers, students should present themselves in a professional manner in both dress and speech.

Selection Criteria

1. The preceptor must have academic preparation as necessary for the position of a nurse educator or nurse administrator.
2. The preceptor must have a minimum of three (3) years of experience in the area of clinical specialty and role.
3. The preceptor must agree to provide opportunities, which will allow students to meet course objectives and requirements.
4. The preceptor must state an interest in guiding the student through the practice experience.
5. The preceptor must maintain an unencumbered registered nurse license in the state of practice.
6. The preceptor must have permission from their employing agency to serve as a preceptor.
7. The University of Mobile School of Nursing must have on file or secure a Clinical Agency Agreement for each clinical agency/institution for which the preceptor is employed. Preceptors are employed in clinical agencies with signed, current clinical agreements made between the administration of the University of Mobile contracting on behalf of the UM School of Nursing and the clinical agency’s board of directors or executive officer authorized to sign on behalf of the agency’s governing body. Students cannot begin clinical experiences with a healthcare agency or institution or preceptor without faculty approval and a signed contract that has been approved by the University of Mobile.

Selection Process

1. The student (with the agreement of prospective preceptor) submits the name of preceptor candidate to the course faculty.
2. The prospective preceptor submits an abbreviated vita or resume for review (includes education, work experience, certifications, and licensure).
3. The course faculty interviews the prospective preceptor, if indicated, and reviews their vita or resume to validate credentials to serve in the preceptor role.
4. Upon receipt of the Preceptor Application, the course faculty and the Graduate Department Chair will evaluate the appropriateness of the clinical agency and the qualifications of the clinical preceptor.
Preceptor Responsibilities

1. The student should send links to the Preceptor Application and the Graduate Preceptor Guide to their chosen preceptor.
2. The preceptor will electronically submit the Preceptor Application form to the course faculty member.
   - If a clinical agency contract is needed, the preceptor submits the agency name and contact information of the person responsible for securing/updating a Clinical Agency Agreement document along with the Preceptor Application.

Additional Requirements
- Education/Administration track students are required to be supervised by a minimum of two (2) different preceptors during their program of study (i.e., students may not use the same preceptor for clinical experiences in NU 531 and NU 541).
- Students without a preceptor in place within 30 days prior to commencement of clinical courses NU 531 and NU 541 and will be asked to withdraw from the course.
- Students who fail to provide the appropriate information and documentation regarding their selection of preceptor within thirty (30) days and their selection of clinical site within sixty (60) days will be asked to withdraw from the course.

Preceptor Selection Criteria for Family Nurse Practitioner Program

The Family Nurse Practitioner Program relies on clinical preceptors for direct supervision of the practice experience. Preceptors include Family Nurse Practitioners and Physicians. These practicing professionals are the experts who guide the students in the Family Nurse Practitioner Program with day-to-day experiential learning, role model the most appropriate ways to approach students in an education or administrative setting, and provided feedback in a variety of clinical settings.

Serving as a clinical preceptor is an important, challenging, and rewarding activity, which requires time, attention, and consistent availability to students. Because the contribution of the preceptor faculty is so critical to the quality of the student nurse education or administration learning experience, it is essential that the faculty-student-preceptor relationship be built on mutual respect, professional concurrence, and clear communication.

It is the student’s reasonability to make contact with a potential clinical agency to explore preceptorship opportunities (The Graduate Program Chair and faculty may assist in the process). Students should start early in securing appropriate preceptors. When contacting perspective preceptors or clinical site managers,
students should present themselves in a professional manner in both dress and speech.

Selection Criteria

1. The preceptor must have academic preparation as necessary for the position of a Family Nurse Practitioner or Physician.
2. The preceptor must be actively involved in clinical practice with a minimum of three (3) years of experience in the area of clinical specialty and role.
3. The preceptor must agree to provide opportunities, which will allow students to meet course objectives and requirements.
4. The preceptor must state an interest in guiding the student through the practice experience.
5. The preceptor must have permission from their employing agency to serve as a preceptor.
6. The preceptor must maintain an unencumbered registered nurse license in the state of practice. The preceptor must be about to show verification of license.
7. The preceptor must have Family Nurse Practitioner certification from either the American Nurses Credential Center (ANCC) or the American Association of Nurse Practitioners (AANP).
8. The University of Mobile School of Nursing must have on file or secure a Clinical Agency Agreement for each clinical agency/institution for which the preceptor is employed. Preceptors are employed in clinical agencies with signed, current clinical agreements made between the Curators of the University of Mobile contracting on behalf of the UM School of Nursing and the clinical agency’s board of directors or executive officer authorized to sign on behalf of the agency’s governing body. Students cannot begin clinical experiences with a healthcare agency or institution or preceptor without faculty approval and a signed contract that has been approved by the University of Mobile.

Selection Process

1. The student, with the agreement of prospective preceptor, submits the name of preceptor candidate to the course faculty.
2. Acceptable preceptors for clinical practicum experiences include Family Nurse Practitioners, Certified Nurse Midwives, Pediatric Nurse Practitioners, Physicians (MD or DO). Specific information related to preceptor selection will be discussed in the on-campus orientation held in the fall semester and will also be available in each clinical course syllabi.
3. Students should not select their own personal physician or a relative as a preceptor for clinical courses as this presents a conflict of interest situation.
4. The prospective preceptor submits an abbreviated vita or resume for review (includes education, work experience, certifications, and licensure).
5. The course faculty interviews the prospective preceptor, if indicated, and reviews
their vita or resume to validate credentials to serve in the preceptor role.

6. Upon receipt of the Preceptor Application, the course faculty and the Graduate Department Chair will evaluate the appropriateness of the clinical agency and the qualifications of the clinical preceptor.

Preceptor Responsibilities

1. The student should send links to the Preceptor Application and the Graduate Preceptor Guide to their chosen preceptor.
2. The preceptor will electronically submit the Preceptor Application form to the course faculty member.
   - If a clinical agency contract is needed, the preceptor submits the agency name and contact information of the person responsible for securing/updating a Clinical Agency Agreement document along with the Preceptor Application.

Additional Requirements

- FNP students are required to be supervised by a minimum of four (4) different preceptors during their program of study (for example, students may not use the same preceptor for clinical experiences in FNP courses, NU 510 and NU 512). Students are encouraged to select one primary preceptor per clinical course. This enhances the student’s exposure to different prescriptive and diagnostic approaches. Often there are several appropriate and “correct” approaches to managing different patient health issues.
- Students should select APRN certified preceptors whenever possible. National Task Force (NTF) Criterion IV.B.3 (2016) states, “The supervision of students may be shared with other clinicians serving as clinical preceptors. Programs may use a mix of clinicians to provide direct clinical teaching to students appropriate to the range of clinical experiences required to meet the program objectives. This mix of preceptors may enhance the interprofessional experience for the student...over the course of the program the student has clinical experiences with an APRN preceptor and preferably an NP with expertise in the population-focused area of practice in primary care as appropriate”
- It is recommended that students select no more than two (2) clinical sites per practicum. This provides continuity with the preceptor and gives the student some variety in practice settings.
- Students without a preceptor in place within thirty (30) days prior to commencement of clinical courses NU 510, NU 511, NU 512, and NU 513 will be asked to withdraw from the course.
- Students who fail to provide the appropriate information and documentation regarding their selection of preceptor within thirty (30) days and clinical site within sixty (60) days will be asked to withdraw from the course.
**Professional Behavior in the Clinical Setting**

Students present themselves as ambassadors of the University of Mobile, the School of Nursing and the graduate program. Students are expected to be respectful to preceptors, faculty, staff, patients and their families.

Reports of unprofessional behavior will result in the student being counseled and is subject to review by the School of Nursing Dean. Examples of unprofessional behaviors include disorderly conduct, inappropriate or offensive language, damage or theft of property, disruption, discrimination, behavior or conduct adversely reflecting upon the nursing profession or the School of Nursing.

Students are permitted to have cell phones but they should remain in a pocket in their lab coat and on vibrate. Personal telephone calls should not be made in patient rooms or received in the presence of patients or families.

Each student is required to send their preceptor(s) a thank you note using UM School of Nursing letterhead (letterhead can be obtained from the School of Nursing Administrative Assistant). A copy of the letter must be sent electronically to the course faculty member and will be included with the final course evaluation.

**Professional Dress in the Clinical Setting**

Students are expected to comply with dress code policies established by the School of Nursing, as well as the policies of individual clinical facilities where they are assigned for clinical practice. Dress code requirements will vary among healthcare agencies.

- Students should wear appropriate professional business attire, including a white lab coat (clinical site-specific attire) with the University of Mobile School of Nursing logo embroidered on the front, and photo ID name badge. Professional attire includes dress pants or skirt and conservative top (shorts, jeans, open-toed shoes or low cut shirts are not considered appropriate attire).
- Piercings must be limited to one small earring in the lower ear lobe. For safety reasons, student must refrain from wearing hoops or dangling earrings. Earring size should not exceed 8mm.
- Fingernails must be clean and neatly trimmed (no more than ¼ inch long). Artificial or painted nails, gel nails, acrylic nails are not allowed.
- Visible jewelry in body piercings, including but not limited to nose, facial, or tongue studs, or multiple ear piercings (including those in the upper ear and ear gauges) are not permitted. No oral jewelry is allowed.
- Hair must be neat at all times. Hair of unnatural color, as well as, glitter spray, sequins and other similar artificial adornments are not permissible. Devices used to restrain hair are to be unobtrusive. Long hair should be
pulled back or neatly restrained so it will not interfere with nursing activities. Trends such as multiple colors, shaved eyebrows, extremes in bleaching, dyeing or tinting, dreadlocks, Mohawks, and long spiked hair (colored or natural) are not appropriate.

- Tattoos or body art must be completely covered and appropriately concealed.
- Jewelry. Students may wear only a watch, wedding band, and/or engagement ring. No necklaces, chocker’s, or bracelets are allowed.
- Perfumes, scented lotions, aftershaves, body sprays and other scented products should not be worn.
- Most health care facilities are smoke-free and tobacco free. Smoking (including the use of electronic cigarettes) is not permitted while the student is in professional dress before or during any clinical or laboratory activity.
- No “fanny packs” may be worn as they may interfere with the performance of clinical duties and scarves/neckties are permitted for student safety.
- Personal cleanliness is a prerequisite for patient/client care. Regular bathing, hair washing and use of deodorant are part of personal cleanliness.

Students who fail to comply with the professional dress requirement will not be allowed to participate in clinical practice. Faculty members or approved preceptors will have the right to remove a student from a clinical area if, in their judgment, the student presents an unprofessional appearance or in any way is a threat to patient safety or comfort. The University of Mobile shall have no obligation to refund tuition, accommodate the student, or make any other special arrangements in the event the student is unable to meet the dress code requirements of the clinical agency.

**Progression in the Clinical Setting for FNP students**

Family Nurse Practitioner students enter as novices but move through the program quickly to develop competencies designed to establish an evidence-based practice built on a solid foundation of didactic coursework and clinical experiences focused on assisting graduates to function within the present dynamic health care environment.

In each clinical course, the first 8 hours will primarily be observation, introducing the student to the facility and the practice requirements of the Family Nurse Practitioner. The second clinical day, the student should begin functioning as a beginning health care provider. It is expected that the student will be performing the HPI, focused physical exams, and present cases to the preceptor. The student should the progress to functioning in the provider role, which includes analyzing differential diagnoses, selecting the most likely diagnosis, and recommending an evidence-based treatment plan to the preceptor.
The progression in acclimating to the Family Nurse Practitioner role is individualized and guided by the preceptor. Each of the three clinical courses (NU 510, Children; NU 511, Adults, and NU 512, Women) requires a minimum of 160 patient hours with the student seeing a minimum of 125 patients (direct patient encounters) appropriate for the clinical specific patient population. Preferred sites for NU 510, Family Practitioner I: Care of Children, would be clinical experiences in a pediatric office with either a Pediatrician or a Pediatric Nurse Practitioner. Preferred sites for NU 511, Family Practitioner II: Care of Adults would be clinical experiences in either family practice or internal medicine (not in a specialty clinic) with a physician or a Family Nurse Practitioner. Preferred sites for NU 512, Family Practitioner III: Care of Women would be in obstetrical practices such as doctor's offices with a physician or Family Nurse Practitioner.

The Specialty Focus Practicum requires a minimum of 60 patient hours with the student seeing a minimum of 50 patients (direct patient encounters). Any site (family practice or internist physician offices, urgent care facilities, and specialty areas such as obstetrics, endocrinology, orthopedics, pulmonology, etc.) may be selected to use for specialty hours with approval of course faculty.

In general, students are expected to see one to two patients an hour. The patient population must correlate directly to the clinical experience in which the student is enrolled. Students should see patients who have both acute and chronic illnesses.
SECTION VI: STUDENT INVOLVEMENT/PROFESSIONAL OPPORTUNITIES

Campus Ministries

The UM has many opportunities for students to serve others locally, nationally, and globally. Students are encouraged to participate in Project Serve, Urban Plunge, The Bridge, Youth Hostel Missions, and Focus Fridays. Weekly opportunities may be viewed on the University of Mobile website quick link, “Student Life.”

Committee Memberships

The nursing faculty believes student involvement is important to the work of the School. Students are encouraged to participate in the governance of the school by serving as members of certain University of Mobile School of Nursing standing committees. A graduate student representative from the Education/Administration Program and the Family Nurse Practitioner Program will be asked to serve as active participants on the MSN Faculty Committee. One alternative will also be chosen from both programs. Students may also be asked to serve on ad hoc graduate committees.

The role of the student representative at the MSN Faculty Committee is an important one. In essence, the student representative provides a formal liaison to facility communication between the student cohort and the graduate nursing faculty. As issues are presented in the meetings, the student should feel comfortable to contribute their own ideas and points of view and/or reflect those of the student’s classmates.

The Faculty Organization Bylaws document outline in detail the structure and function of all committees; these bylaws are available for students to view in the School of Nursing.

Family Nurse Practitioner (FNP) Certification Exams

Two certification examinations are available for family nurse practitioner graduates through the American Academy of Nurse Practitioners (AANP) or American Nurses Credentialing Center (ANCC). Both organizations are recognized for licensure by the Alabama Board of Nursing.

Basic Eligibility Requirements:

- Full name, as printed on your state issued ID and address.
- A copy of your current RN license with expiration date including the year.
- Complete information about the FNP Program and Program Descriptions with required coursework, clinical clock hours, sites and preceptors.
• Complete clinical site information, including the names and addresses (street number, city, state and zip code) of the clinical agencies, and a description of the practice specialty (i.e., Family).
• All preceptors’ full name and credentials.
• An official transcript of academic coursework to date, and/or final transcript stating degree with date conferred.
• Payment in full (including the paper application fee if applicable).

Specific Eligibility Requirements:
Students are responsible for being informed on the application process regarding the AANP or ANCC Family Nurse Practitioner Certification Exams as eligibility requirements may change. Students should visit both agencies’ websites for complete details regarding general and specific requirements.

National Certification Opportunities

The tracks of the Master’s program lead to eligibility for national certification.
• Certified Nurse Education (CNE), credentialed by the National League of Nursing (NLN).
• Certified in Executive Nursing Practice, credentialed by the American Organization of Nurse Executives (AONE).
• Certified Nurse Manager and Leader, credentialed by the American Organization of Nurse Executives (AONE).
• Certified Family Nurse Practitioner, credentialed by the American Academy of Nurse Practitioners (AANP).
• Certified Family Nurse Practitioner, credentialed by the American Nurses Credentialing Center (ANCC).

National Professional Organizations

Membership in national nursing organizations such as American Nurses Association (ANA), National League for Nursing (NLN), Nurses Association of the American College of Obstetrician and Gynecologists (NAACOG), National Association of Pediatric Nurse Practitioners (NAPNAP), American Association of Nurse Practitioners (AANP), and American Association of Critical-Care Nursing (ACCN) is encouraged.

Sigma Theta Tau, Omicron Chapter
Sigma Theta Tau International Honor Society of Nursing is the second largest nursing organization in the United States and among the five largest and most prestigious in the world. Sigma Theta Tau International is dedicated to improving the health of people worldwide by increasing the scientific base of nursing practice. Members are nursing scholars committed to the pursuit of excellence in clinical practice, education, research and leadership. The society exists to recognize superior achievements in nursing, encourage leadership development, foster high
nursing standards, and to strengthen the commitment to the ideals of the profession.

Students in Graduate Programs shall be eligible for membership if they have achieved excellence according to the standards approved by the Society. Students must have completed a minimum of one-quarter of the required graduate curriculum and demonstrate academic excellence as evidence by a GPA of 3.5 or higher.

Graduate students who are members of this national nursing honorary society are encouraged to participate in local Omicron Chapter activities.
SECTION VII: STUDENT RESOURCES AND SERVICES

Bookstore

The campus bookstore is located in the J.L. Bedsole Library building on the first floor. Textbooks and related supplies such as university gear and snacks may be purchased in the bookstore. MasterCard and Visa are accepted for purchases. The Hours of Operation are 8:30 AM – 6:00 PM, Monday through Thursday and 10:00 AM – 4:00 PM on Friday. For more information, students should call 251.679.9293 or email umobile@bkstr.com

Campus Security

The University of Mobile maintains security guards on duty 24 hours per day. The security guard may be contacted at 251.510.4273.

Center for Excellence in Healthcare Practice

The UM School of Nursing maintains a Nursing Skills Laboratory, a Health Assessment Laboratory, and Simulation Center for students located on the second floor of the Weaver Hall Building. These learning resources for the School of Nursing allow students to develop knowledge, skills, and attitudes necessary for applying theory to nursing practice. This learning environment serves students in the School of Nursing by providing an excellent opportunity for self-directed independent learning and the practice of basic and advanced nursing skills. The nursing lab and simulation center are equipped with newborn, infant, child, adult and maternal human patient simulators (both mid and high-fidelity) as well as a wide selection of task trainers. The lab is equipped with cameras and recording equipment, which can be used for real-time, shared learning and in debriefing areas. Center hours vary and are posted on the School of Nursing website. Family Nurse Practitioner students will learn advanced practice skills such as suturing, debridement, client assessment, etc. during On-Campus Focus Sessions (Intensives).

The Nursing Skills Laboratory contains seven (7) hospital beds with equipment storage, five (5) full body mid-fidelity manikins and numerous task trainers (IV arms, ostomy training, wound care, injections, etc.)

The Health Assessment Laboratory contains 3 exam tables with equipment storage.

The Simulation Center contains two simulation rooms and a control room. One room has a Labor and delivery birthing simulator (referred to as Lucina), an infant simulator, and a pediatric simulator. The second room contains an adult medical-surgical simulator (referred to as iStan). Other learning tools kept in the simulation rooms include: defibrillator, 12 lead EKG, crash cart, IV and feeding tube pumps, etc. Both rooms have audio-video recording capability.
**Library**

The J.L. Bedsole library is available for student use with a primary emphasis of establishing and maintaining library support of the academic curriculum. The library also seeks to provide instruction in research skills that serve students during their studies at UM and in the paths they choose after graduation. Hours of Operation: 7:45 AM-10:00 PM, Monday-Thursday; 7:45 AM-4:30 PM Friday, 10:00 AM-5:00 PM Saturday, and closed Sunday. The library can be accessed through MyUM.

**Parking and Traffic Regulations**

Any student who operates a motorized vehicle of any type on campus must register the vehicle with the Office of Campus Operations. Students will receive a “hangtag” parking permit. Vehicles are registered online at https://www.permitsales.net/UofMobile

The University assumes no responsibility or liability for any vehicle on campus, whether or not school is in session. In the event of damage to or theft of a vehicle on the campus, if the person who caused the damage or committed the theft cannot be determine, the owner/operator of the vehicle and/or his insurance company shall be responsible for any damages or loss.

**Postal Services**

A contract station of the United States Post Office is located on the first floor of the Weaver Hall Building and offers all standard services. The post office is open to students from 7:30 AM until 5:30 PM Monday through Thursday.

**Registrar’s Office**

The Registrar’s Office is located in the Weaver Hall Building on the first floor. The office is responsible for maintaining official student records and verifying that students are eligible to sit for licensure examinations. Official copies of transcripts are available from this office.

**Student Success Center**

The Student Success Center provides academic consulting services to students enrolled at the University of Mobile. Academic consultants meet individually with students and provide assistance with developing the skills and behaviors that are essential to academic success and professional development. Services are available at no charge to the learner and may address a wide range of issues. These include transition to professional school, time management, study skills, stress management, testing strategies, interpersonal and communication skills, clarifying career goals, and coping strategies.
Professional counseling is also available to UM students through the Student Success Center located in the Rosemary Adams Building. More specific contact information is located on the UM webpage under the quick link, “Student Life.”
SECTION VIII: STUDENT RESPONSIBILITIES

Ethical Practice

The University of Mobile graduate nursing program supports the American Nurse’s Association Code of Ethics for Professional Nurses. All students must abide by the ANA Code of Ethics during their clinical performance. The philosophical basis for safe practice by faculty and students is described in the ANA Code of Ethics (2016).

| Provision 1. | The nurse practices with compassion and respect for inherent dignity, worth, and unique attributes of every person. |
| Provision 2. | The nurse’s primary commitment is to the patient, whether an individual, family group, community or population. |
| Provision 3. | The nurse promotes, advocates for, and protects the rights, health, and safety of the patient. |
| Provision 4. | The nurse has authority, accountability, and responsibility for nursing practice: makes decisions; and takes action consistent with the obligation to promote health and to provide optimal care. |
| Provision 5. | The nurse owes the same duties to self as to others, including the responsibility to promote health and safety, preserve wholeness of character and integrity, maintain competence, and continue personal and professional growth. |
| Provision 6. | The nurse, through individual and collective effort, established, maintains, and improves the ethical environment of the work settings and conditions of employment that are conducive to safe, quality health care. |
| Provision 7. | The nurse, in all roles and settings, advances the profession through research and scholarly inquiry, professional standards development, and the generation of both nursing and health policy. |
| Provision 8. | The nurse collaborates with other health professionals and the public to protect human rights, promote health diplomacy, and reduce health disparities. |
| Provision 9. | The profession of nursing, collectively through its professional organizations, must articulate nursing values, maintain the integrity of the profession, and integrate principles of social justice into nursing and health policy. |

Liability Insurance

All graduate students enrolled in clinical and practicum courses participate in the University of Mobile Nursing Student Liability Insurance Program. There are no additional fees related to this liability coverage.
**Licensure**

The School of Nursing requires that graduate students demonstrate a level of competence commensurate with the educational and experiential prerequisites for admission and progression in the program. Graduate students are required to maintain licensure as a Registered Nurse in their state of residence to practice nursing as a registered nurse throughout their educational program at the University of Mobile. In addition, students must hold licensure as a registered nurse in any state where the practice/practicum requirements are completed. The student is required to provide verification of licensure from the appropriate state board.

The University of Mobile’s residential campus is located in the state of Alabama; therefore, our students and faculty must abide by the regulations of the Alabama Board of Nursing. Nursing courses with a clinical component may not be taken by any individual who has been denied licensure by the Alabama Board of Nursing; or whose license is currently suspended, surrendered or revoked in any United States jurisdiction; or whose license is currently suspended, surrendered, or revoked in another country due to any disciplinary action.

**Safe Clinical Practice**

The faculty and staff of the School of Nursing support the University of Mobile Preamble, Mission Statement, Vision Statement, Biblical Worldview, and Statement of Christian Affirmation. The faculty and administration have the expectation that learning, faith and leadership will be reflected in the interactions and actions of all individuals involved with the activities of the School of Nursing. The intent of the University is reflected in the phrase, “Changing Lives to Change the World” and is evident in the core values of being Christ-centered, Academically-focused, Student-devoted, and Distinctively-driven. It is expected in clinical practice that these attributes be evident.

Safety in nursing practice and research is required of all professional nurses and all students of professional nursing. In order to ensure safe practices students are expected to:

- Assume responsibility for own actions.
- Demonstrate self-discipline in meeting commitments and obligations, submitting written assignments on time, keeping appointments, etc.
- Preparing in advance for clinical or practicum experiences.
- Function within the guidelines and policies of the institution, in which they are practicing, and within their Scope of Practice and according to all legal parameters.
- Communicate appropriately, accurately, truthfully.
- Recognize own limitations and the need for appropriate supervision.
- Provide competent care for all individuals regardless of age, sex, race, or diagnosis.
• Obtain preceptor signature on all patient documentation, including charting and prescriptions.
• Notify the Graduate Program Chair and/or Dean immediately of any change in licensure status, i.e. probation, suspension, or revocation.

The following situations are considered unsafe and are absolute grounds for course failure and may result in dismissal from the program:
• Preceptor or healthcare agency/institution refusal to continue working with the student due to clinical safety issues.
• Student is under the influence of alcohol, recreational drugs, or medications that impair judgment in the clinical, classroom, and/or research setting.
• Positive drug test for non-prescribed or illegal drugs; or refusal of drug testing.
• Abuse or inappropriate behavior, including but not limited to intimidation, threats or acts of violence to patients, staff, faculty, or other students.
• Fraudulent or dishonest behavior.
• Behavior or judgment that compromises the safety of a patient.
• Other unsafe clinical practice as deemed by faculty.
• Violation of rules of professional conduct established by accrediting or licensing bodies.
• Any act or behavior, which violates the objectives and/or policies of the School of Nursing; Clinical Agency, the Alabama Board of Nursing Nurse Practice Act, or the Board of Nursing Nurse Practice Act in the state where the student maintains licensure.

**Student Conduct**

As practicing professionals, students are responsible participants in their educational experiences at the University of Mobile. Students are expected to display professionalism, respect, kindness in all aspects of their work and study. This includes, but is not limited to, email conversations, discussion board posts, phone calls and face-to-face encounters with fellow students, faculty, staff, preceptors, clinical agencies, and patients. Incidences of student incivility will be reported to the Graduate Program Chair and the MSN Faculty Committee for appropriate action. Students will be given a written warning and may face dismissal if episodes of incivility or inappropriate behavior continue.
SECTION IX: APPENDICES

Appendix A-Graduate Student Handbook Acknowledgement

The University of Mobile School of Nursing has distinct expectations of students that are outlined in the UM Catalog and the UM School of Nursing Graduate Student Handbook.

The purpose of this form is to disclose and document:

(1) I have been made aware of these official university documents,

(2) I have read the UM School of Nursing Graduate Student Handbook in its entirety,

(3) I have familiarized myself with the expectations contained in the document and all questions or concerns have been clarified to my satisfaction,

(4) I will maintain responsibility for all updates to the Handbook each semester as a student in the Graduate nursing program at UM, and

(5) I have read and understand the UM School of Nursing Graduate Handbook and agree to abide by all policies and procedures throughout my enrollment in the UM School of Nursing.

## Appendix B-Essential Core Performance Standards

<table>
<thead>
<tr>
<th>CORE PERFORMANCE: Cognitive Skills</th>
<th>The student must demonstrate the ability to:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Learn, integrate and analyze large volumes of complex, technically detailed information to perform clinical problem solving. Synthesize and apply concepts and information in formulating diagnostic and therapeutic judgments.</td>
<td></td>
</tr>
<tr>
<td>2. Learn and perform common diagnostic procedures (laboratory, cardiographic, radiologic, and to interpret the results, recognizing deviations from the norm and identifying pathophysiologic processes).</td>
<td></td>
</tr>
<tr>
<td>3. Evaluate patient status and make responsible decisions regarding appropriate courses of action/treatment within given time constraints.</td>
<td></td>
</tr>
<tr>
<td>4. Effectively synthesize data from the patient, medical records, verbal reports, medical history and observation for the purpose of recommending or maintaining treatment.</td>
<td></td>
</tr>
<tr>
<td>5. Differential multiple patient situations simultaneously.</td>
<td></td>
</tr>
<tr>
<td>6. Apply critical reasoning and independent decision making skills.</td>
<td></td>
</tr>
<tr>
<td>7. Apply quantitative methods of measurement, including calculation, reasoning, analysis, and synthesis.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>CORE PERFORMANCE: Psychomotor Skills</th>
<th>The student must demonstrate the ability to:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Sitting: Maintain upright posture</td>
<td></td>
</tr>
<tr>
<td>2. Standing: Maintain upright posture</td>
<td></td>
</tr>
<tr>
<td>3. Locomotion: Ability to physically maneuver in required clinical settings and accomplished assigned tasks.</td>
<td></td>
</tr>
<tr>
<td>4. Manual tasks:</td>
<td></td>
</tr>
<tr>
<td>a. Maneuver or move an individuals body parts or clinical equipment effectively to perform evaluation and treatment techniques, including palpation, percussion, auscultation, and other diagnostic maneuvers.</td>
<td></td>
</tr>
<tr>
<td>b. Maintain an object in a constant position for an extended period.</td>
<td></td>
</tr>
<tr>
<td>c. Competently perform basic cardiac life support (BCLS) using guidelines from the American Heart Association.</td>
<td></td>
</tr>
<tr>
<td>d. Pushing/pulling ability to exert force against a small or large object to move it closer or further away.</td>
<td></td>
</tr>
<tr>
<td>e. Coordination of both gross and fine motor movements, equilibrium, and a function use of special senses sufficient to provide general care and emergency treatment of</td>
<td></td>
</tr>
</tbody>
</table>
patients (the opening of obstructed airways, the suturing of wounds, and performing simple obstetrical maneuvers).

f. Apply adequate pressure to arrest bleeding.

5. Small motor/hand skills:
   a. Legibly record/document history and physical examinations, consultations, etc., in standard/electronic charts in hospital/clinical settings in a timely manner and consistent with the acceptable normal of clinical settings.
   b. Apply a firm grasp.
   c. Operate a push button telephone.
   d. Perform precision movements (venipuncture, catheterization, IV regulation, dressing changes, etc.), which may further include invasive procedures into the central circulation or highly specific body cavity/spaces.
   e. Sense through palpation changes in an individual's muscle tone, soft tissues, skin quality, and temperature and sense responses to environmental changes and treatment.
   f. Manipulate a blood pressure cuff, stethoscope, thermometer; insert catheters, IV's, NG tubes; perform injections and manipulate equipment as required.
   g. Carry out basic laboratory tests.
   h. Carry out diagnostic therapeutic procedures (phlebotomy, venipuncture, placement of catheters and tubes).

6. Visual acuity to:
   a. Legibly record/document history and physical examinations, consultations, etc., in standard/electronic charts in hospital/clinical settings in a timely manner and consistent with the acceptable normal of clinical settings.
   b. Perform precision movements.
   c. Identify tiny markings and inscriptions (i.e., on syringes, thermometers, IV bags, etc.).
   d. Identify color changes and coding.
   e. Read ECGs and X-rays.

7. Hearing or ability to receive:
   a. Effectively respond to verbal requests from patients and team members.
   b. Interpret the language used to communicate lectures, instructions, concepts, narratives, questions, and answers.
   c. Auscultate and percuss for internal body sounds, e.g. heart sounds, bowel sounds, lung sounds.

8. Communication Ability:
   a. Effectively and sensitively communicate to other students, teachers, patients, peers, and other support staff to ask questions, explain conditions and procedures, and
teach programs in a timely manner and within the acceptable normal of academic and clinical settings.

b. Receive and interpret written information in both academic and clinical settings in a timely manner. Communication in oral and written form with health care team must be effective and efficient.

c. Should be able to speak, to hear, and to observe patients in order to elicit information, perceive non-verbal communication, and describe changes in mood, activity, and physical presence.

9. Self Care: Maintain general good health and self-care in order to not jeopardize the health and safety of self and individuals with whom one interacts in the academic and clinical settings.

<table>
<thead>
<tr>
<th>CORE PERFORMANCE: Affective Skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Function effectively with good judgment under stressful and demanding clinical situations.</td>
</tr>
<tr>
<td>2. Adapt to changing and chaotic environments.</td>
</tr>
<tr>
<td>2. Possess and maintain the emotional health required for the full utilization of his intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the diagnosis and care of patients, and the development of mature, sensitive and effective relationships with patients.</td>
</tr>
<tr>
<td>3. Tolerate physically and intellectually demanding workloads (averaging 50-60 hours/week).</td>
</tr>
<tr>
<td>4. Adapt to constantly changing environments, display flexibility, and learn to function in the face of uncertainty or ambiguity.</td>
</tr>
<tr>
<td>5. Demonstrate the personal qualities of compassion, integrity, concern for others, self-discipline, focus, and self-motivation.</td>
</tr>
<tr>
<td>6. Exhibit emotional stability that enables full utilization of abilities to engage in safe care to patients</td>
</tr>
<tr>
<td>7. Demonstrates compassion, integrity, concern for others and effective interpersonal skills.</td>

Appendix C-Criminal Background Acknowledgment and Consent

UNIVERSITY OF MOBILE SCHOOL OF NURSING
CRIMINAL BACKGROUND CHECK POLICY AND PROCEDURE
STUDENT’S ACKNOWLEDGMENT AND CONSENT

I, ____________________________, have read the University of Mobile School of Nursing Criminal Background Check Policy and Procedure, and understand that as a precondition to assignment to or placement with any affiliating clinical agency. By my signature below, I hereby give my complete and voluntary consent to have a Certified Criminal Background Check as required by the School of Nursing.

I understand that pursuant to the School of Nursing’s policy, an unfavorable Certified Background Check or refusal to submit to a Certified Background Check may result in dismissal from the program that I am enrolled in. I understand that I may be subject to additional Certified Background Checks while enrolled in the School of Nursing. Any adverse finding may result in dismissal from the School of Nursing.

I understand that I must be compliant with the Criminal Background Check Policy and Procedure and once enrolled, I must disclose any legal or criminal convictions and/or arrests within a three (3) day time period.

This notarized document constitutes my consent for a Certified Criminal Background Check by a School of Nursing designated vendor. It also constitutes consent for the vendor to release the results of my Certified Criminal Background Check to the Dean of the School of Nursing and for the Dean to release my background information as required to any clinical agency where I am assigned.

In Witness Whereof, this instrument is executed this the ___ day of ________, 20__.

DRUG TESTING AND RELEASE OF INFORMATION
STUDENT’S ACKNOWLEDGMENT AND CONSENT

I, ____________________________________________, have read the University of Mobile School of Nursing Drug Screen Policy and Procedure, and understand that as a precondition to assignment to or placement with any affiliating clinical agency, I am subject to that particular agency’s substance abuse policies and/or drug/alcohol testing policies, and I am required to submit to pre-clinical placement drug testing, random drug testing, or drug testing when there is reasonable suspicion to believe that I may be impaired. By my signature below, I hereby give my complete and voluntary consent to any such drug test(s) at a designated laboratory as required by the School of Nursing.

I understand that pursuant to the School of Nursing’s policy, a positive drug test or refusal to submit to testing will result in immediate dismissal from the program that I am enrolled in. I understand that a negative drug test is required for matriculation in the nursing program.

This notarized document constitutes my consent for drug testing by a School of Nursing designated laboratory. It also constitutes consent for laboratory to release the results of my drug test to the Dean of the School of Nursing and for the Dean to release any positive findings to the appropriate licensing board if indicated.

In Witness Whereof, this instrument is executed this the ___ day of ________, 20__.

Appendix E-NONPF Nurse Practitioner Competencies

National Organization for Nurse Practitioner Faculties (NONPF)
Nurse Practitioner Competencies (2017)
Source: http://www.nonpf.org

At the completion of the FNP program, the FNP graduate should posses the nine (9) core competencies.

Scientific Foundation Competencies

1. Critically analyzes data and evidence for improving advanced nursing practice.
2. Integrates knowledge from the humanities and sciences within the context of nursing science.
3. Translates research and other forms of knowledge to improve practice processes and outcomes.
4. Develops new practice approaches based on the integration of research, theory, and practice knowledge.

Leadership Competencies

1. Assumes complex and advanced leadership roles to initiate and guide change.
2. Provides leadership to foster collaboration with multiple stakeholders (e.g. patients, community, integrated health care teams, and policy makers) to improve health care.
3. Demonstrates leadership that uses critical and reflective thinking.
4. Advocates for improved access, quality, and cost effective health care.
5. Advances practice through the development and implementation of innovations incorporating principles of change.
6. Communicates practice knowledge effectively, both orally and in writing.
7. Participates in professional organizations and activities that influence advanced practice nursing and/or health outcomes of a population focus.

Quality Competencies

1. Uses best available evidence to continuously improve quality of clinical practice.
2. Evaluates the relationships among access, cost, quality, and safety and their influence on health care.
3. Evaluates how organizational structure, care processes, financing, marketing, and policy decisions impact the quality of health care.
4. Applies skills in peer review to promote a culture of excellence.
5. Anticipates variations in practice and is proactive in implementing interventions to ensure quality.
Practice Inquiry Competencies

1. Provides leadership in the translation of new knowledge into practice.
2. Generates knowledge from clinical practice to improve practice and patient outcomes.
3. Applies clinical investigative skills to improve health outcomes.
4. Leads practice inquiry, individually and in partnership with others.
5. Disseminates evidence from inquiry to diverse audiences using multiple modalities.
6. Analyzes clinical guidelines for individualized application into practice.

Technology and Information Literacy Competencies

1. Integrates appropriate technologies for knowledge management to improve health care.
2. Translates technical and scientific health information appropriate for various user's needs.
   2.a. Assesses the patient’s and caregiver’s educational needs to provide effective, personalized health care.
   2.b. Coaches the patient and caregiver for positive behavioral change.
3. Demonstrates information literacy skills in complex decision-making.
4. Contributes to the design of clinical information systems that promote safe, quality, and cost effective care.
5. Uses technology systems that capture data on variables for the evaluation of nursing care.

Policy Competencies

1. Demonstrates an understanding of interdependence of policy and practice.
2. Advocates for ethical policies that promote access, equity, quality, and cost.
3. Analyzes ethical, legal, and social factors influencing policy development.
4. Contributes in the development of health policy.
5. Analyzes the implications of health policy across the disciplines.
6. Evaluates the impact of globalization on health care policy development.
7. Advocates for policies for safe and healthy practice environments.

Health Delivery System Competencies

1. Applies knowledge of organizational practices and complex systems to improve health care delivery.
2. Effects health care change using broad based skills including negotiating, consensus-building, and partnering.
3. Minimizes risk to patients and providers at the individual and systems level.
4. Facilitates the development of health care systems that address the needs of
culturally diverse populations, providers, and other stakeholders.
5. Evaluates the impact of health care delivery on patients, providers, other
   stakeholders, and the environment.
6. Analyzes organizational structure, functions, and resources to improve the
delivery of care.
7. Collaborates in planning for transitions across the continuum of care.

Ethics Competencies

1. Integrates ethical principles in decision making.
2. Evaluates the ethical consequences of decisions.
3. Applies ethically sound solutions to complex issues related to individuals,
   populations, and systems of care.

Independent Practice Competencies

1. Functions as a licensed independent practitioner.
2. Demonstrates the highest level of accountability for professional practice.
3. Practices independently managing previously diagnosed and undiagnosed
   patients.
   3.a. Provides the full spectrum of health care services to include health
       promotion, disease prevention, health protection, anticipatory guidance,
       counseling, disease management, palliative, and end-of-life care.
   3.b. Uses advanced health assessment skills to differentiate between normal,
       variations of normal and abnormal findings.
   3.c. Employs screening and diagnostic strategies in the development of
diagnoses.
   3.d. Prescribes medications within the scope of practice.
   3.e. Manages the health/illness status of patients and families over time.
4. Provides patient-centered care recognizing cultural diversity and the patient or
designee as a full partner in decision making.
   4.a. Works to establish a relationship with the patient characterized by mutual
       respect, empathy, and collaboration.
   4.b. Creates a climate of patient-centered care to include confidentiality, privacy,
       comfort, emotional support, mutual trust, and respect.
   4.c. Incorporates the patient’s cultural and spiritual preferences, values, and
       beliefs into health care.
   4.d. Preserves the patient’s control over decision making by negotiating a
       mutually acceptable plan of care.
   4.e. Develops strategies to prevent one’s own personal biases from interfering
       with delivery of quality care.
   4.f. Addresses cultural, spiritual, and ethnic influences that potentially create
       conflict among individuals, families, staff, and caregivers.
5. Educates professional and lay caregivers to provide culturally and spiritual
   sensitive, appropriate care.
6. Collaborates with both professional and other caregivers to achieve optimal care.
outcomes.
7. Coordinates transitional care services in and across care settings.
8. Participates in the development, use, and evaluation of professional standards and evidence-based care.
Appendix F-Family Nurse Practitioner Competencies

Family Nurse Practitioner Competencies

These are entry-level competencies for the family nurse practitioner that supplement the core competencies for all nurse practitioners. The population in primary care family practice includes newborns, infants, children, adolescents, adults, pregnant and postpartum women, and older adults. The focus of care is the family unit, as well as the individuals belonging to the family. Family nurse practitioners demonstrate a commitment to family-centered care and practice primarily in ambulatory care settings.

Upon graduation or entry into practice, the family nurse practitioner should demonstrate competence in the categories described below:

I. HEALTH PROMOTION, HEALTH PROTECTION, DISEASE PREVENTION, AND TREATMENT

A. Assessment of Health Status

These competencies describe the role of the family nurse practitioner in assessing all aspects of the patient’s health status, including for purposes of health promotion, health protection, and disease prevention. The family nurse practitioner employs evidence-based clinical practice guidelines to guide screening activities, identifies health promotion needs, and provides anticipatory guidance and counseling addressing environmental, lifestyle, and developmental issues.

1. Obtains and accurately documents in a relevant health history for patients of all ages and in all phases of the individual and family life cycle.
2. Assesses (a) the influence of the family or psychosocial factors on patient illness, (b) conditions related to developmental delays and learning disabilities in all ages, (c) women’s and men’s reproductive health, including, but not limited to, sexual health, pregnancy, and postpartum care, and (d) problems of substance abuse and violence.
3. Performs and accurately documents appropriate comprehensive or symptom-focused physical examinations on patients of all ages (including developmental and behavioral screening and physical system evaluations).
4. Performs screening evaluations for mental status and mental health.
5. Identifies health and psychosocial risk factors of patients of all ages and families in all stages of family life cycle.
6. Demonstrates proficiency in family assessment.
7. Demonstrates proficiency in functional assessment of family members (e.g. elderly, disabled).
8. Assesses specific family health needs within the context of community
assessment.
9. Identifies and plans interventions to promote health with families at risk.
10. Assesses the impact of an acute and/or chronic illness or common injuries on the family as a whole.
11. Distinguishes between normal and abnormal change with aging.

B. Diagnosis of Health Status

The family nurse practitioner is engaged in the diagnosis of health status. This diagnostic process includes critical thinking, differential diagnosis, and the integration and interpretation of various forms of data. These competencies describe this role of the family nurse practitioner.

1. Identifies signs and symptoms of acute physical and mental illnesses across the life span.
2. Identifies signs and symptoms of chronic physical and mental illness across the life span.
3. Orders, performs, and interprets age, gender, and condition-specific diagnostic tests and screening procedures.
4. Analyzes and synthesizes collected data for patients of all ages.
5. Formulates comprehensive differential diagnoses, considering epidemiology, environmental and community characteristics, and life stage development, including the presentation seen with increasing age, family, and behavioral risk factors.

C. Plan of Care and Implementation of Treatment

The objectives of planning and implementing therapeutic interventions are to return the patient to a stable state and to optimize the patient’s health. These competencies describe the family nurse practitioner’s role in stabilizing the patient, minimizing physical and psychological complications, and maximizing the patient’s health potential.

1. Provides health protection, health promotion, and disease prevention interventions/treatment strategies to improve or maintain optimum health for all family members.
2. Treats common acute and chronic physician and mental illnesses and common injuries in people of all ages to minimize the development of complications, and promote function and quality of living.
3. Prescribes medications with knowledge of altered pharmacodynamics and pharmacokinetics with special populations such as infants and children, pregnant and lactating women, and older adults.
4. Adapts care to meet the complex needs of older adults arising from age changes and multiple system disease.
5. Identifies acute exacerbations of chronic illness and intervenes appropriately.
6. Evaluates the effectiveness of the plan of care for the family, as well as the
individual, and implements changes.
7. Evaluates patient’s and/or other caregiver’s support systems and resources and collaborates with and supports the patient and caregivers.
8. Assists families and individuals in the development of coping systems and lifestyle adaptations.
9. Makes appropriate referrals to other health care professionals and community resources for individuals and families.
10. Provides care related to women’s reproductive health, including sexual health, prenatal, and postpartum care.
12. Performs primary care procedures, including, but not limited to, suturing, minor lesion removal, splinting, microscopy, and pap tests.
13. Recognizes the impact of individual and family life transitions, such as parenthood and retirement, on the health of family members.
14. Uses knowledge of family theories and development to individualize care provided to individuals and families.
15. Facilitates transitions between health care settings to provide continuity of care for individuals and families.
16. Intervenes with multigenerational families who have members with differing health concerns.
17. Assists patient and family members to cope with end of life issues.
18. Applies research that is family-centered and contributes to positive change in the health of and health care delivery to families.

II. NURSE PRACTITIONER-PATIENT RELATIONSHIP

Competencies in this area demonstrate the personal, collegial, and collaborative approach, which enhances the family nurse practitioner’s effectiveness of patient care. The competencies speak to the critical importance of interpersonal transactions as they relate to therapeutic patient outcomes.

1. Maintains a sustaining partnership with individuals and families.
2. Assists individuals and families with ethical issues in balancing differing needs, age-related transitions, illness, or health among family members.
3. Facilitates family decision-making about health.

III. TEACHING-COACHING FUNCTION

These competencies describe how the family nurse practitioner’s ability to impart knowledge and associated psycho-motor skills to patients. The coaching function involves the skills of interpreting and individualizing therapies through the activities of advocacy, modeling, and tutoring.

1. Demonstrates knowledge and skill in addressing sensitive topics with family members such as sexuality, finances, mental health, terminal illness, and substance abuse.
2. Elicits information about the family’s and patient’s goals, perceptions, and resources when considering health care choices.
3. Assesses educational needs and teaches individuals and families accordingly.
4. Provides anticipatory guidance, teaching, counseling, and education for self-care for the identified patient and family.

IV. PROFESSIONAL ROLE

These competencies describe the varied role of the family nurse practitioner, specifically related to advancing the profession and enhancing direct care and management. The family nurse Practitioner demonstrates a commitment to the implementation, preservation, and evolution of the family nurse practitioner role. As well, the family nurse practitioner implements critical thinking and builds collaborative, interdisciplinary relationships to provide optimal care to the patient.

1. Demonstrates in practice a commitment to the care of the whole family.
2. Recognizes the importance of participating in community and professional organizations that influence the health of families and supports the role of the family nurse practitioner.
3. Interprets the family nurse practitioner role in primary and specialty health care to other health care providers and the public.
4. Serves as a resource in the design and development of family community-based health services.

V. MANAGING AND NEGOTIATING HEALTH CARE DELIVERY SYSTEMS

These competencies describe the family nurse practitioner’s role in handling situations successfully to achieve improved health outcomes for the patient, communities, and systems through overseeing and directing the delivery of clinical services within an integrated system of health care.

1. Maintains current knowledge regarding state and federal regulations and programs for family health care.

VI. MONITORING AND ENSURING THE QUALITY OF HEALTH CARE PRACTICE

These competencies describe the family nurse practitioner’s role in ensuring quality of care through consultation, collaboration, continuing education, certification, and evaluation. The monitoring function of the role is also addressed relative to monitoring one’s own practice as well as engaging in interdisciplinary peer and systems review.

Covered in the core competencies.

VII. CULTURAL COMPETENCE
These competencies describe the family nurse practitioner’s role in providing culturally competent care, delivering patient care with respect to cultural and spiritual beliefs, and making health care resources available to patients from diverse cultures.

Covered in the core competencies.
Appendix G-MSN Level Competencies

MSN LEVEL COMPETENCIES
Source: http://aacn.nche.edu

Expected outcomes for core courses were derived from the Essential of Master’s Education for Advanced Practice Nursing (AACN, 2011). Outcomes for the nursing education major were derived from the Nurse Educator Competencies by the Southern Regional Educational Board.

MSN Level Competencies for the Master of Science in Nursing Education/Administration Track

Core Competencies (All students)
Following the completion of NU 502, NU 503, NU 504, and NU 518):

1. Effectively utilize research in the practice or educational setting.
2. Demonstrate an understanding of health care policy, organization and financing of health care.
3. Describe a process for making ethical decisions.
4. Provide an inclusive definition of advanced practice nursing roles.
5. Critique, analyze, and evaluate a variety of nursing theories.
6. Develop an understanding of the wide diversity of subcultural influences on human behavior.
7. Foster principles of health promotion, illness prevention, and maintenance of function across the health-illness continuum.

Nursing Education Core Curriculum (All students)
Following the completion of NU 505, NU 515, NU 516, NU 517, NU 540, and NU 541):

1. Develop curricula based on the mission, philosophy, and framework of the program and the institution.
2. Define goals and objectives.
3. Plan instructional objectives and content consistent with overall curricular goals.
4. Organize content and learning experiences according to principles of learning.
5. Design instructional strategies to achieve learning goals.
6. Evaluate learning and achieving of goals.
7. Construct tests to measure learning.
8. Incorporate technology into curricula.
9. Use current research findings and scholarly works in nursing to improve education.
Nursing Education Practicum Experience (All students)
Following the completion of NU 540 and NU 541 the student will:

1. Use appropriate theoretical frameworks and learning principles to socialize students into the role of professional nursing.
2. Help learners use education resources effectively.
3. Provide clinical supervision for learners.
4. Select, plan, implement, and evaluate learning experiences.
5. Promote nursing scholarship in academic and practice settings.
6. Communicate effectively with peers, students, administrators, and others to facilitate improvements in nursing education.
7. Demonstrate professional and educational values.
8. Effectively apply teaching strategies in the classroom learning setting.

Nursing Administration Core Curriculum (All students)
Following the completion of NU 505, NU 516, NU 518, NU 530, and NU 531 the student will:

1. Develop effective oral and written communication skills.
2. Exhibit knowledge of the health care environment in a variety of areas.
3. Utilize principles of leadership in managing personnel.
4. Promote an environment of professionalism.
5. Develop a repertoire of business skills related to health economics and financial management.
6. Incorporate the use of information technology for data entry to improve nursing practice.
7. Develop motivation methods to influence the behavior of others.
8. Utilize management principles to develop strategic plans.
9. Use recent research findings and scholarly works in nursing to improve health care management.

Nursing Administration Practicum Experience (All students)
Following completion of NU 530 and NU 531 the student will:

1. Use appropriate theoretical frameworks and learning principles to socialize student into the role of nursing administration.
2. Build a collaborative relationship with others in the health care delivery system.
3. Engage staff and others in shared governance related to decision making.
4. Develop goals for quality improvement in the health care organization.
5. Promote nursing scholarship in the practice setting.
7. Demonstrate professional and ethical values.
8. Effectively apply administrative leadership strategies in the health care setting.
9. Participate and analyze financial management plans of health care organization.
